The new Autumn Hats show a tendency towards large shapes.

The question of the moment isn't it. The color, shape and material of your fall hat, uncommonly smart looking, with the correct, refining touch, almost all are individual, and range all the way from a small hat one wears with a suit, to the broader brimmed creations seen on dress occasions.

Children's and Misses' Hats in Felt, Velvet, Silk, and Velour, with corded bands and streamers.

New individual Veils and Veiling.

WILSON'S HARDWARE. 46-c

TEACHERS' CONVENTION

The teachers of Lennox held their annual meeting in N. C. I. on Thursday and Friday, October 12th and 13th.

A record number was in attendance, and ideal weather aided in making this one of the most pleasant meetings held by this Institute.

Rev. A. H. Foster kindly conducted the opening exercises, after which the general business was conducted.

Thursday afternoon session opened with a violin solo by Miss Dorothy Scott, and a vocal solo by Miss Mary Daly. The President's adress was given by Miss Margaret Mitchell, of Newburgh, after which Mr. E. J. Corkill, B.A., LP.S., gave the Inspector's address.

Mr. A. F. Hagerman, Normal Scool, Peterboro, gave two very practical talks, and Mr. G. V. McLean, M.A., N.C.I., at the request of the teachers, gave two very useful lessons in arithmetic, on percentage and discount. The demonstration in physical culture by Miss McLaughlin's class, and a talk on Primary work, by Miss Hawley, were especially interesting, as were also a lesson in physical geography by Mrs. Wilson, and a talk on Stories, and How to Tell Them, by Miss Crozier.

Dr. H. W. Morden, N.C.I., expressed his pleasure at being given this opportunity to introduce himself to the teachers, and promised his aid at any future meetings of the Institute.

The teachers spent a very enjoyable Social Hour during which ice cream and cake were served, and all greatly enjoyed the community singing led by Mr. W. J. Sprague. Regret was expressed that all the teachers did not remain for the Social Hour.

On Thursday evening an entertainment was given by the teachers in the town hall, Mr. E. J. Corkill acting as chairman. The programme consisted of an instrumental solo by Miss Hawley, a violin solo by Mrs. C. Wilson, a recitation by Miss K. Wilson, of Strathcona, and a vocal solo by Miss F. Dwyer. Each of these ladies kindly responded to an encore.

The main feature of the evening entertainment was a lecture on "The Days of Our Grandfathers," by Mr. W. S. Herrington, K.C. The audience gave rapt attention throughout.

Mr. Corkill moving a vote of thanks, said it was generally felt that this was one of the best, if not the best, ever given by the Teachers' Association.

The meeting closed with "God Save the King."

The officers for the next year are:

President—Miss J. Dennee.

Vice-President—Miss Magee.

Sec.-Treas.—E. Harrison.

Delegates to O. E. A.—Miss Breault and Miss Sheridan.

Members of Executive—Messrs. McLean, Trenouth, Andrews, Dr. Morden, and Misses Mitchell, Mair, and Wilson.

CAMDEN EAST

Mrs. J. W. Ainsley and baby boy, of Mississippi, granddaughter of Mrs. Booth, of Kingston, visited her sister, Mrs. Ellen Lucas, during a recent week-end.

Several from this vicinity attended the Odessa fair, the last one of the season.

Mr. and Mrs. L. Hartman were recent visitors with friends at Maple avenue.

Mr. James Baines and his mother, Wilton, spent Sunday last with Mr. and Mrs. Fred Sniker.

It is to be hoped that at the concert given by the W. C. T. U. everyon will be on time as no interruptions can be permitted while any of the girls are giving their recitations. Rev. Mr. Nickle will be the chairman. The music will be given by Mr. and Mrs. Hamilton, Bethel street, Miss Ruby Simmons, Bicknell's Corners, Mrs. Fairbairn, violin solo, and by the members of the choir. The presiding judges of this interesting competition are Miss Wilson, Miss Hawley and Mrs. Fairbairn. The medals and prizes will be presented immediately after the decisions are given.

U. F. O. CONVENTION

The annual County Convention for the Federal Riding of Lennox and Addington will be held in the

Town Hall, Napanee

—on—

Wed. November 8th,

at 1 o'clock

Election of officers, discussion of matters pertaining to county interests.

The attention of U.F.O. Clubs in each township is called to Sections 26, 27, and 11 of the Constitution.

Select your own township representatives and send delegates with credentials.

Mr. E. J. Sexsmith, M. P., and others will address the meeting.

Women of the county are especially invited.

A meeting of the County Directors will be held in the Council Chamber, in the Town Hall, at 10 a.m., on the same day (**Nov. 8th**).

J. L. HAYCOCK,
County Director.
SCHUYLER FRENCH,
Secretary.

RICHMOND COUNCIL

Selby, October 3rd, 1922

The council met in the town hall in Selby, Reeve presiding.

The following members were present: Clinton Kellar, Reeve; and Councillors Schuyler French, W. J. Gollinger, and John Schermerhorn.

Minutes of last meeting were read and adopted.

A communication, signed by several ratepayers, re ditching street adjoining Napanee, was received and matter left in the hands of township engineer.

Moved by Schuyler French, and seconded by John Schermerhorn, that John E. Hudgins' pay sheet for September, for $592.25, be paid and cheques issued for the same. Carried.

Moved by John Schermerhorn, seconded by Schuyler French, that Melville Windover be paid $16.00 bonus on 64 rods wire fence along lots 14 and 15, in the township of Richmond.

Moved by Schuyler French, and seconded by W. J. Gollinger, that the following accounts be paid: Mrs. Doney, aid for October, $5; Mr. Nelson Hart, aid for October, $30. Carried.

Council adjourned to meet on Monday, Nov. 6th, 1922.

H. A. WOOD, Clerk.

NEWBURGH

Newburgh is in the midst of a real estate boom. Considerable property has changed hands. Mr. J. S. Yeomans has sold his property consisting of eight acres with buildings, thereon, to Mrs. Ferris. Mr. Yeomans has purchased the store and dwelling formerly owned by Geo. Stone. Mr. Richard Lillie purchased the old Bay of Quinte Railway station and grounds attached, and sold his present residence to Mr. J. Sinclair, of Toronto.

Mr. Fluke, who moved from here to Yarker, has returned to Newburgh and occupies one of Mr. B. Weese's houses on Church street.

Mr. Fred McDonald is moving into the village and will occupy Mr. Ralph Laurence's house on Grove street.

An appeal came from the Central Red Cross Society in Toronto for aid to the sufferers from the fire in Northern Ontario. The officers of the local branch called a public meeting at which it was decided to respond to the appeal and plans were made and committees appointed to carry out the work which is well under way. The village council were applied to for a grant and although funds were low they granted $50, which will easily be doubled by private donations..

YARKER

The recent heavy rains have made the ground so wet that farmers are not able to plough. Nearly all the farmers in this vicinity have their potatoes and apples harvested.

The I. O. O. F. have improved their hall by putting on a new roof.

Quite a number from here attended anniversary services in Moscow and took in the fowl supper.

Mrs. Cambridge is having Mr. Manson Lee put a new roof on her kitchen.

A number of Oddfellows went to Napanee on Tuesday evening of last week and paid a fraternal visit to Napanee Lodge, No. 86.

Mr. and Mrs. Geo. O'Brien and son have returned to Trenton after visiting her sister, Mrs. Clinton Richardson.

Albert Warner had the misfortune to have one of his barns burned early on Monday morning of last week, losing all the contents, with just a small insurance on it.

Miss Simmons, Actinolite, is visiting her sister, Mrs. Clinton Richardson.

The Benjamin Basket factory is running full Blast under the new management.

Mrs. J. T. Main has returned home after visiting Kingston friends.

D. L. Leonard entertained some Moscow friends recently.

Miss Annie Warner has gone for a holiday to Toronto for a couple of weeks.

WILTON

Mr. and Mrs. Eldridge Babcock have returned, having taken a two week's motor trip, stopping at Ontario, spent several days with Earl Burt, and other frineds in Wilton.

Mr. and Mrs. Guy Simmons and two sons, and Miss Willows spent a recent Sunday at the home of Horace Denyes, Odessa.

Dr. and Mrs. Murphy and two sons, Kingsgton were recent visitors at the home of Mrs. Murphy's father, N. Simmons.

Nearly every one from Wilton and vicinity attended the fair at Odessa.

Rich and varied program of amusements at the Made-in-Belleville Industrial Exhibition and Carnival; Argyll Light Infantry Band, Belleville Symphony Orchestra, Eureka Quartette and Solo Singing, Jitney Dancing, Baby Show, Guessing Contests, Dancing nightly, Masquerade Carnival; Friday, Radiophone Concerts, afternoon and evening. Exhibits open from 2 to 11 p.m. daily. Admission, 15c.; children, 10c. Armouries, Belleville, Oct. 24-28. 46-b

THE LATE MRS. M. C. BOGART

On the eve of her intended departure for an autumn trip through the Adironack Mountains, Emma, the wife of Mr. M. C. Bogart, was taken suddenly ill, and after a week's sickness died at "Fairview," her beautiful home, on Sunday morning, the 8th instant. The funeral service was conducted at her late residence by two of her former pastors, the Rev. Dr. S. J. Shorey, and the Rev. Dr. E. N. Baker, on Tuesday afternoon, the 10th instant, and despite a heavy downpour of rain a large concourse of friends were present to pay respect to her memory.

Mrs. Bogart was a woman with a wide circle of acquaintances, and she rightfully considered each one her friend, as she was of an exceptionally genial disposition, with a smile and kind word for everyone she met. Her father and mother were both descendants of the first settlers in this County, and she took a deep interest in the development of a national and patriotic spirit, and was naturally proud of the fact that she was of U. E. L. descent.

Mrs. Bogart had travelled with her husband extensively in foreign lands and had an intelligent appreciation of the interesting places visited by her, and on more than one occasion has furnished delightful entertainment to Napanee audiences with her account of her travels.

She was a prominent member of the Daughters of the Empire, an active worker in the Methodist church, and a ready and generous supporter of every patriotic and philantropic movement. Her loss will be keenly felt by the different organizations with which she was intimately connected, and more particularly by a host of friends who sincerely mourn her sudden death.

DR. R. BRUCE TAYLOR

Principal of Queen's University,

will conduct

ANNIVERSARY SERVICES

ST. ANDREW'S PRESBYTERIAN CHURCH

—on—

SUNDAY, OCTOBER 22ND

STELLA

Threshing on the island is about completed and farmers have commenced ploughing.

The potato crop on the island is not a large one, and apples are very scarce.

A quantity of buckwheat has recently been shipped from here by steamer Brockville to the Kingston Milling Company.

The schooner Maple Leaf loaded grain at L. R. Neilson's warehouse.

Quite a number from here attended the Odessa fair.

R. J. O'Connor has rented his farm on the bay shore to Stanley Connor's.

Mrs. Fo Finnegan, Sunbury, has sold her farm here to George T. Howard.

DENBIGH

Mrs. G. Adam, Miss Bertha Stein and Mr. H. Warhich arrived home again from Glasgow station where they enjoyed being the guests at the wedding of Miss Lillian McMillan with Mr. Elmore McLean, both of Glasgow Station.

Mrs. E. W. Petzold also arrived home from a pleasant visit with her parents, Mr. and Mrs. Wm. Thompson, of Golden Bay.

The Misses Margaret Adam and Lois McMillan, of Renfrew, who were visitors of our school for a few days, have returned to town and resumed their studies at the High School.

Mr. J. C. Adams, of Kingston, who was a welcome guest of his parents, Dr. and Mrs. J. Adams, also returned to the city.

The Misses Erma and Hilda Falk, of Napanee, who enjoyed an extend pleasant visit with their parents and other relatives, have returned to their former occupations in town.

The Misses Anna and Alma Kilpen left for Cleveland, Ohio, where they have secured positions.

Threshing is about completed in this vicinity and most of the farmers are busy digging their potatoes and harvesting their roots. Good yields are the rule, husking corn, potatoes and roots are generally reported.

Several husking bees have already been enjoyed.

Considerable much needed improvements have lately been made on some of our main public roads.

SALUTE TO THE TREES

Many a tree is found in the wood
And every tree for its use is good;
Some for the strength of the
gnarled root,
Some for the sweetness of flower
or fruit;
Some for shelter against the
storm,
And some to keep the hearthstone warm;
Some for the roof and some for
the beam,
And some for a boat to breast the
stream.
In the wealth of the wood since
the world began
The trees have offered their gifts
to man.

Henry Van Dyke.

FOR FLETCHER'S

CASTORIA

AUTO CRITICISM

Let us begin by admitting, high, wide and handsome, that automobiles are an important contribution to our hasty civilization. They facilitate business in many ways and enrich life for those who are able to afford them and to use them with discretion. But it does not follow that, because a brief may be held for automobiles, every moron, paranoiac and congenital idiot should be allowed the use of one as soon as he can command the price—usually by inheritance. Hardly a day passes that the papers do not tell of from one to a dozen accidents caused by incompetent or careless handling of automobiles. Why is it that a man who can pay the price for an automobile can get one whether he has the knowledge and skill to run it or not? I understand that there is a system of licensing, but I have never known of anyone being refused as to his ability to run a car with safety to himself and the world in general. On the other hand I have known persons without enough technical or mechanical ability to qualify them to be the chauffer of a wheelbarrow to get a motor car and start out without previous training to spread devastation on the streets and highways. Perhaps the people will have to be killed before this sort of thing is finally regulated? It seems to me that the matter should be brought to court their examination should take a wider scope than an inquiry into the rate of speed at which they were travelling at the time. An investigation should be made as to whether the driver should be travelling at all at any rate of speed. The worst speed maniacs I have known have been people to whom it did not matter whether they got to any place at any time or whether they got there at all. It would be no importance to them or to anyone else whether they were in one place or another or whether they were anywhere. And yet they are the ones who are always in an everlasting hurry. When such persons get into a smash-up or injure someone they should be sent to the seclusion of a penitentiary to give their excited motor nerves time to cool. Fining is not enough punishment for fool speeders who can give no real excuse for being abroad at all..

A CITIZEN.

TAMWORTH

The members of Lorne Lodge, No. 404, A.F. & A.M., Tamworth, held an "At Home" in the assembly hall of the high school on the evening of October 11th, about one hundred and forty persons were present. W. S. Herrington, K.C., past D.D.G.M., gave a lecture on his trip through Europe with lantern views, which was very interesting and instructive. Rev. Mr. Poston and Rev. Mr. Clark also gave short addresses. Miss Poston, Mrs. W. W. Redden and Mrs. C. Lochhead furnished the musical programme. Mrs. Aylsworth, one of the pioneer members of Lorne Lodge, acted as chairman in his usual able manner.

Bishop Bidwell held confirmation in Christ Church on Sunday, October 8th.

John O'Brien, one of Tamworth's respected citizens, died at his residence on Thursday, Oct. 5th.

Quite a number of the Tamworth people attended Tweed fair.

GET READY FOR THE CHASE

SPECIAL TRAIN FOR HUNTERS

The open season for hunting deer and moose in Northern Ontario is rapidly approaching. South of the French and Mattawa rivers, Nov. 15th to 30th inclusive; north and west of these rivers, Oct. 25th to Nov. 30th inclusive. Nowhere on the Transcontinental Railway line the season is from Sept. 15th to Nov. 15th inclusive.

The Canadian National Railways traverse the finest hunting territory in this country. This fact, with their special and regular train services, makes "The National Way" the premier line for the hunters. The hunting grounds are so vast there is game for everyone.

The selection of grounds is a most important matter and one which requires careful study. The territory reached by the Canadian National lines north of Parry Sound is already a favorite one. The new country east and west of Caprael is as yet comparatively little known to the hunter, and should, therefore, be highly attractive to the follower of the deer and moose.

The Canadian National Railways are providing special train service, which with regular trains will meet all demands. Special trains will be operated as follows:

Leave Toronto Union Station 11.15 p.m., Oct. 31st, for Caprael and intermediate points, and 11.15 p.m. 2nd, 3rd, and 4th for Key Jct. and intermediate points. The usual ample accommodation of sleeping cars, baggage cars and coaches will be provided.

The Annual Hunters' Leaflet issued by the Canadian National Railways is now ready for distribution, and may be obtained on application to any agent of the Company, or write General Passenger Department, Room 607, Royal Bank Bldg., Toronto. 46-c

Just arrived—a fresh shipment of Neilson's super-creams—60c. a pound, at WALLACE'S.

How Garage sales are increased *by Long Distance*

Some quotations from recent reports:

"We use Long Distance extensively to call up prospects and sell."

"We use Long Distance to all our sub-agents, to keep in touch with sales."

"We depend on Long Distance to sell our vulcanizing service."

"We order parts in the morning by Long Distance and get them in the afternoon."

"We put 'Use the Bell to Sell' stickers on all price lists and sales literature we send out."

"Ask us about our FREE LONG DISTANCE SERVICE on new parts," a Motor Sales Co. writes out-of-town garages.

We can tell you how to apply Long Distance to almost any business

DIRT-CHEAP LIGHTING

By J. E. MIDDLETON

Additional electric service to the towns in Okanagan Valley is being provided by an extension of the transmission lines of the Kootenay Power Company of British Columbia. The pole-line parallels the Kettle Valley Railway to Penticton and is now in process of construction. A fruit broker on the way to Vancouver became eloquent in the smoking car concerning the advantages which this new power supply would bring. "We shall get energy," he said, "at a rate of only one-third of the present charge. We pay now 15c. per kilowatt hour. The Kootenay Company will serve us for 5c. Power will be dirt cheap."

In comparicon with the rates charged in many of the Hydro municipalities of Ontario 5c. is not particularly low. Average monthly consumption in Toronto is 51 kilowatt hours for domestic lighting and 171 kilowatt hours for commercial. If the rates were 5c. without considering a possible service charge, the monthy bills would be $2.55 and $8.55 respectively. Actually they are $1.11 and $3.87.

There are nearly seventy municipalities, large and small, in Ontario which are getting an average kilowatt-hour rate of less than 5c. for both domestic and commercial lighting, the service charge being included in each case. In these instances and aso in the case of other Hydro municipalities where the rates are 5c. or upwards, the consumer is in the process of acquiring the plant that serves him. Year by year the debenture liabilities are being reduced and reserve funds are piling up which, in time, will equal the entire investment. Not a dollar of the money collected for electric service goes towards share-dividends such as every private company must provide for. Further the share capital of a private joint stock company is irreducible. The dividend remains a perpetual charge against the revenue.

The Hydro-Electric System of Ontario is organized to provide for the speedy extinction of all capital liability, so that ultimately the only burden upon the consumer will be the annual cost of operation and maintenance. The plant of the local municipality will be a municipal asset free of incumbrance. Because of this fact Hydro rates in Ontario which even now challenge competition with those of any private company must ultimately be still lower. As the capital obligation is reduced the cost of the service must go down, and the consumer will get the benefit.

If 5c. is "dirt-cheap" in British Columbia what would that fruit broker think of the average kilowatt hour rates collected in the following Ontario communities?

	Domestic	Commercial
Barrie	2.7c.	2.3c.
Brampton ...	2.3c.	2.1c.
Brantford ...	1.6c.	1.2c.
Caledonia ...	3.2c.	2.6c.
Collingwood..	2.7c.	2.3c.
Dundas	1.9c.	2.0c.
Galt	2.0c.	2.0c.
Guelph	2.6c.	2.2c.
Hamilton	2.3c.	1.1c.
Kitchener ...	2.6c.	1.7c.

And many other instances of low charges could be given.

Problems of Average Farm.

To arrange the work of the farm so that each department can be made to turn a profit is one of the important problems of the average farm. Where silos are added to the farm buildings a change of farm management must follow. Less hay is needed, less land is required for pasture, more stock can be kept on the land, more land must be used for corn, or at least sufficient corn must be planted to fill the silo. Less labor is required to feed the stock, but more must be provided during the short season of silo filling.

PUMPING AN OCEAN DRY.

Dutch Engineers Are Now at War With Nature.

A wonderful engineering feat is being carried out in Holland. It is nothing less than an attempt to reclaim a large portion of the Zuider Zee.

Where at present fishermen sink their nets there will rise villages, poplar-bordered roads, and sleepy canals, and new farms and homes for thousands of people.

Holland has always been at war with the sea. More than a third of the total area of the kingdom lies below sea-level, and would be flooded were it not for its dykes and sand dunes.

Indeed, the Zuider Zee itself is a result of the bursting of the dykes. This happened in the thirteenth century, and, in addition to Holland being cut in two, and Friesland being separated from the rest of the country by a large sheet of water, hundreds of villages were submerged and about 80,000 persons were drowned.

Dutch engineers are building a great dam, or embankment, across the northern end of the sea, from Wieringen, in North Holland, to Piaam, in Friesland. It will have a length of about fifteen miles, and will carry a double-line railway and road for ordinary traffic, thus affording a more easy access between North Holland and Friesland. Communication with the North Sea will be maintained by thirty-three large sluice gates and a couple of locks for shipping.

Within the embankment four areas, known as the northwestern, southwestern, northeastern, and southeastern, are to be drained and reclaimed. It will result in adding 827 square miles, an area almost as large as the county of Cornwall, to Holland.

The construction of the embankment alone is expected to occupy nine years, and a sum of $75,000,000.

How to Get a House.

Look into almost any pool upon the rocky parts of the beach and you will see winkle and whelk shells scuttling about [illegible] amazing activity. None of th[illegible]le snails that built the shells co[illegible] move so rapidly.

As a matter of fact, the original builder has in almost every case been devoured by the present tenant of the house.

The cousins of the hermit crab are provided by nature with a solid armor plating for their bodies, but he possesses a long soft tail which has no protection, and for this reason he is regarded by most fish as a delicacy. His only hope is to find some unsuspecting whelk, whose shell will do admirably as a protection for his tail. His long claws enable him to haul out the shellfish, and having dined on the late tenant he proceeds to occupy his house, into which he inserts his unprotected tail.

If you look at a hermit crab, you will notice that one of his claws is larger than the other. This arrangement provides him not only with a deadly "right" in battle, but also with a ready-made front door for his stolen house. When he retires into the shell the big claw is used to close the entrance so that no other house-hunter can evict him.

Trespassers Will Be Prosecuted.

During the holiday months many people wonder what they may and may not do in the way of crossing land or rowing on rivers. Notice boards warn them that trespassers will be prosecuted.

As a matter of fact, most of these boards are quite meaningless if you do no damage. To cross another man's field or park is no crime in the eyes of the law, provided that you do not break down fences or trample upon growing crops. In any case you cannot be prosecuted for merely walking on private land; all that the owner can do is to sue you for any damage you may have done.

If he meets you and threatens you, consent to withdraw, and offer ten cents as compensation for the havoc you have wrought. If this is done no prosecution will follow.

When crossing private property, be careful to close gates after you. If, in consequence of your carelessness, sheep or cattle stray and do damage to crops, you may be held liable and made to pay.

There is a right of way up and down all tidal rivers, but that does not mean that you may loiter. If you moor your boat to the bank you may become a trespasser.

Took Unusual Voyage.

Paddling their own canoe down the Hudson, two Canadian lawyers, Antoine Chauvin and Phillip Brais, rounded the battery and tied up one day early in August, just ten days to the hour after they had set out from Montreal in their tiny craft. They journeyed by way of the St. Lawrence and Richelieu rivers, Lake Champlain, Lake George, and then, after a portage, paddled down the Hudson.

Brais, formerly secretary of Montreal Bar Association, said he and his companion, out of curiosity, counted their strokes the first day of the trip, and found that they swung the paddles 18,600 times before pitching camp for the night. They slept in the open every night.

The most thrilling part of the journey, both agreed, came at its close, when the tide in the Hudson below 14th street and particularly the swirl around the tip end of Manhattan Island, threatened continually to swamp their canoe.

Strength of Wires.

Of three wires of the same thickness, one made of gold will sustain 150 pounds, one of copper 302 pounds, and one of iron 549 pounds.

World Wheat Crop.

A summary of the latest estimates of wheat production for the United States, Canada, India, Algeria, Tunis, Morocco and Japan indicates an aggregate production of about 1,549,000,000 bushels this year, compared with 1,440,000,000 bushels last year. Comparative figures for fourteen countries of Europe show a probable production of 892,000,000 bushels this year, compared with 1,006,000,000 bushels last year.

WILSON'S HARDWARE.

REBUILDING OF LOUVAIN

CANADIAN STUDENT WILL HELP TO RESTORE TREASURES.

Plans Have Been Made to Restore Famous Belgian University Which the Huns Destroyed — Valuable Books Contributed by the British and Money-Glutted United States Will Provide Cash.

By the free-will offerings of the British people and by the forced gifts of the German universities, the treasures of the library of Louvain University are being restored. From Canada and the United States will come the money and plans for the building itself, to replace that which Kultur ravaged.

Britain vainly attempted to save this great mediaeval treasure and now hastens to come forward with hundreds of thousands of volumes as gifts toward the restoration.

America, entering the war too late to have any effect on the course of events in Belgium, endeavors handsomely to recognize the valor and worth of that stricken land.

The case of Germany is vastly different and needs no great elaboration. Kultur, so far as has been ascertained, did not steal the books. It simply annihilated them.

On the night of August 25, 1914, the beautiful old building was wilfully destroyed. There was no military necessity for it. Perhaps it was drunken fury. Perhaps it was a deliberate attempt to insult Christendom and civilization.

German apologists have said that the treasures of the library were not burned; but that thousands of volumes were taken from the place before the torch was applied. If that is so, where are the books that were saved? Certainly they are not in Belgium.

By the terms of the treaty of Versailles, Germany is compelled to send ten thousand books a month to Louvain in reparation. These books are picked by a committee of scholars selected by Louvain University and confirmed by King Albert.

Are the books in Germany? The libraries of Heidelberg, Leipsic, Jena and Bonn are being carefully combed for literary treasures that will help to repair the damage. But so far not one of the books which filled the old Cloth Market, as it was called, has been found.

Only one manuscript of the old library was saved. Prof. van der Essen, of the university, happened to have at his home manuscript No. 906, which contains the official correspondence of the university from about 1583 to 1637. The rest is dust.

The facts are sufficient verbal condemnation of Germany, as they are also full of honor to the powers that saved civilization. As soon as the war was over, M. De la Tour, president of the French Institute, headed an international committee for the reconstruction. It was felt that a building which had been housing literary gems from 1425 on was not to be left as Germany left it.

De la Tour invited Whitney Warren, of New York and Paris, to become the architect. Last year, Cardinal Mercier approved the plans and President Butler, of Columbia, laid the corner stone. This summer the American Colleges are raising the funds among the undergraduates. If they fail, Pierpont Morgan and other financiers will pay the shot.

Meanwhile Britain has been pouring forth her treasures in bound volumes, manuscripts and prints to provide something which Germany can never yield. The German universities do not hold the greatest treasure trove in literature, for the glad offerings of Oxford and Cambridge, London and Manchester are intrinsically more valuable and sentimentally incomparable.

Already there are enough volumes on hand to make a library which few universities on this continent could approach. Three hundred thousand volumes, including many from France and Italy, are already stored in Louvain, and a fireproof structure must soon be made available, or chance might precipitate a second holocaust.

"Destroyed by the Germans, 1914; restored by America, 1922," reads the inscription on Mr. Warren's plans. That applies to the building, which is the body of which a collection of rare printed matter is the soul. Visible on the balustrade will be the inscription in Latin which, freely translated, reads: "Destroyed by Teutonic Fury; Restored by American Gift."

The cost of the new structure will be $1,000,000. The memorial tower will rise to a height of 275 feet. The chimes will play the National Anthems of the four nations, Belgium, France, Britain and America, every hour. Ultimately, two million books will be stored there in the stock rooms inside the Flemish Renaissance pile.

Before the Louvain campaign closes Canada may hear a good deal about it. It is planned to invade the Canadian universities next fall, when the students are in funds. So Canada will have her share in peace as in war in the succor of Belgium. Like Britain, this country rushed to Belgium's aid, crossing the Atlantic with an Armada in weeks instead of years, but alas; too late. This country, however, cannot aid like Britain with books, for our libraries are too young to supply many rare manuscripts.

Our gifts will be in money in 1922 as it was in lives seven years ago. And when 1924 rolls around and the final ceremonies are being staged, the Canadian universities will be represented. Their crests will adorn the walls and the names of their students will appear forever (or pending another Hun irruption), on the golden book of donors to the new Louvain. Toronto, McGill, Queens, and all the smaller universities will be asked to participate.

Wrote About Canada.

By writing a thesis on Canadian history, F. H. Seward, of Toronto, who received his B.A., with honors, in modern history, from the University of Toronto, has gained the degree of bachelor of letters from Oxford University. He has just been appointed lecturer in history at the University of British Columbia.

KING WITH SHADY PAST.

Ferocious Insect That Breathes Through Its Tail.

The dragon fly — quite the aristocrat of all insects—is a gentleman with a very shady past.

Before becoming king of the insects he spends the greater part of his life at the bottom of a pond crawling about in the mud, in a state known as a larva.

This larva is a water-insect, nearly as long as a dragon-fly, has six legs, and breathes through his tail. He gets his food by the underhand method of lying half hidden in the mud and waiting for some unsuspecting insect to pass by.

Then, suddenly, from underneath his innocent-looking head, out shoots a long jointed arm with a pair of pincers at the end, grabs the insect, and transfers it to his mouth. He then replaces his pincers, or "mask" as it is called, under his head, and waits for the next comer.

Gradually this ferocious armor-plated insect grows bigger, and near the end of the second year a change of feeling comes over him; he wants to split.

So, leaving his mud for the last time, the larva slowly climbs up some convenient stalk one sunny day in May or June, and comes to the surface.

Here he hangs on to a leaf, and almost at once the sun dries his skin till it becomes as hard and brittle as an eggshell.

He himself is doing his best to puff and blow his body up, when suddenly he splits right up the back and out crawls a pale white insect with its wings neatly folded.

Leaving its old shell still standing on the leaf, this delicate, sickly-looking insect crawls higher up and perches in the full warmth of the sun.

Slowly the wings unfold, and gradually it takes on all the brilliant colors of a fully-developed dragon-fly. Soon it becomes strong, and off it goes in search of food. There is no learning how to fly—it does it straight away.

Many people imagine a dragon-fly can sting, because of the pincer-like finish to its long body, and for that reason dragon-flies are sometimes called "horse-stingers," or "devil's darning-needles." But dragon-flies cannot sting. The head is fitted with strong jaws, with which it catches butterflies and other insects and tears them to pieces. If it is attacked it will sometimes turn and inflict a nasty bite with its jaws and perhaps draw blood.

There is a curious thing about the coloring of a dragon-fly. The males are often slate colored under the body, while the females are yellow, with darker side spots. But if you take these two skins and wash them in water, all the color not common to both will wash off, and the male and female of the same species will be found to be the same color.

When a male and female are found both the same in color it means that the male has had his extra coat of color washed off by rain or dew, so it would be hardly surprising if his wife failed to recognize him after a night out.

A Veteran Geologist.

Full of honors and achievements the dean of North American geologists, Prof. A. P. Coleman of the University of Toronto, is being made a doctor of science of the institution to which he has given his maturer years. In his youth a student and professor at Victoria University, then located at Cobourg, Ont., Dr. Coleman gave a long period of service to the province as provincial geologist and to the university, the Dominion and the world as teacher and explorer. To a wide circle of friends, Dr. Coleman is known as one of kindliest character, a staunch friend and a loving brother. It can scarcely be that he shall wander far afield in the next ten years, although his enthusiasm for mountain climbing seems unabated. But his teaching is something of great charm and his interest in students keen after forty-one years in the professoriate.

Arthur Philemon Coleman is a son of the parsonage. After obtaining the best training in natural sciences available in this country in the seventies, he studied at Breslau University and then came home to teach. Not to speculators but to geologists is Canada's mineral industry primarily due. He is a wise prospector who goes to areas which the exploring geologist has marked as favorable. For many years from 1893 onwards, Prof. Coleman studied the minerals of his native Ontario. In recent decades he has done much work of a less economic and more scientific character among the Rockies. Although a student of rocks, he is also a lover of Alpining for its own sage and for the pleasure of painting scenery and formations. He is noted for his thoughtfulness of others while climbing and for his good nature in camp.

With hobbies, serious pursuits and with a considerate course of life toward others, Dr. Coleman has achieved years without boredom and successes without elation. Not only through seniority but through affection has he become dean of the faculty of arts, while his fellowship in the Royal Society is sufficient testimony to his position in the world of science. To recount his many honors and writings is unnecessary; where there is character to be praised, the mention of rewards is superfluous. Fortunate in his services, the university is regretful at his retirement which occurs shortly.

An Aged Woman Gardener.

Mrs. William Russell, who is 87 years of age, and lives in the west end of Mitchell, Ont., has a garden consisting of half an acre of land which is filled with vegetables, such as potatoes, corn, beets, carrots, beans, and many kinds of flowers.

This garden, which is kept in excellent shape, is worked solely by Mrs. Russell, who rises at four o'clock every morning, and works in her garden most of each day.

Porcelain.

Porcelain was introduced into England from China about 1531. Tea followed about 1600. Oranges were first brought into Europe from China in 1547.

INDEPENDENCE

THE DOMINION GOVERNMENT ANNUITIES SYSTEM
affords an unequalled opportunity for the investment of small or large amounts for the purchase of an annuity of from $50 to $5,000 a year for life, to begin immediately or at any future age desired, and to be paid in monthly or quarterly instalments.

Annuities may be purchased on a single life, or on the lives of two persons jointly.

After contract issues, no restriction as to residence.

Employers may purchase for their employees—School Boards for their teachers—Congregations for their Ministers.

Cannot be seized or levied upon.
No medical examination required.
Free from Dominion Income Tax.

SECURITY—THE DOMINION OF CANADA

Descriptive booklet may be obtained by applying to the Postmaster or by writing, postage free, to S. T. Bastedo, Superintendent Dominion Government Annuities, Ottawa. When writing, kindly state sex, and age or ages last birthday.

COUNTY OF LENNOX AND ADDINGTON

TREASURER'S SALE OF LANDS FOR TAXES

County of Lennox and Addington,
To Wit:

By virtue of a warrant under the hand of the Warden and seal of the County of Lennox and Addington, bearing date the Tenth Day of July, A.D., 1922, and to me directed, commanding me to levy upon the lands mentioned in the following list for arrears of taxes due thereon, and the costs as therein set forth.

I HEREBY GIVE NOTICE that unless the said arrears and costs are sooner paid, I shall proceed to sell the said lands, or so much thereof as may be necessary for the aforesaid taxes and costs, at the Court House, in the Town of Napanee, on WEDNESDAY, the 25th DAY OF OCTOBER, A.D., 1922, beginning at the hour of ten o'clock in the forenoon, and in compliance with the Assessment Act.

Should any of the aforementioned lands remain unsold they will be again offered at an adjourned sale to be held on Wednesday, the 22nd day of November, for any price they will bring. The municipalities directly concerned give notice of their intention to purchase, if taxes are not fully covered, or for any sum they may deem advisable.

The public will please remember that this is a strictly CASH sale. Private cheques will not be accepted unless MARKED by the bank upon which they are drawn and must be at par here.

Non-patented, or any lands in which the Crown has an interest will be sold subject to those provisions.

W. J. SHANNON,
Treasurer of the County of Lennox and Adington.

Dated at Napanee this 10th day of July, 1922.

LIST OF LANDS TO BE SOLD FOR ARREARS OF TAXES 1922

TO RIFLE LUSITANIA.

Americans Make Plans to Recover Lost Treasure.

Plans are rapidly approaching completion for the great enterprise of salvaging the Lusitania. In Philadelphia, the steamer Blakely is being outfitted for this task, which will be essayed some time this summer. Capt. Rickards is in charge, and the diver, who is really the mainspring of the expedition, is Benjamin F. Leavitt, also of Philadelphia. If any could succeed in reaching the Lusitania it might well be Leavitt, for he, so far as is known, has gone down deeper into the water than any other man who has ever returned. He went down 361 feet in locating the Pewabic, sunk in the Great Lakes in 1865, and salvaged copper and other material valued at $26,000. This was in 1916. Leavitt believes that it will be easier to reach the Lusitania, but admits that it is likely to be much more difficult to gain access to her and recover the sunken treasure. This is valued roughly at $15,000,000.

Some years ago Leavitt invented and patented a diving suit, and it is because of the tests that this suit has withstood that he believes he can descend 285 feet, to where the Lusitania lies, and work long enough to secure the specie and jewels that she carried to the bottom of the Atlantic, off Kinsale Head, Ireland. The suit is armored from head to foot, with the exception of the heavy plate glass that will be adjusted before his eyes. It is said that the suit has withstood a pressure of 200 pounds to the square inch, to which an object is subjected 500 feet beneath the surface of the water. The main section of the suit is a heavy manganese bronze casting, which covers trunk and head. Leg and arm pieces are made of a specially constructed copper coil, planned to give the utmost possible protection with ease of movement. Unlike old-fashioned divers, he will not be dependent on a rope for the purpose of signalling those above. He will carry a little telephone and will be able to give the most minute directions.

This telephone wire will be enclosed in a stout cable, capable of lifting twenty tons, and Leavitt believes that this cable, added to the strength of his armor, will be sufficient to withstand any pull necessary to haul him to safety should he became caught in the wreckage. This is probably the greatest risk he runs, and it is this which makes the salvaging of the Lusitania so different from the salvaging of any other vessel that has ever been attempted. The diver's air supply will be carried on his back in a cylinder fixed to the main casting. One and a quarter cubic feet of oxygen, properly mixed with hydrogen will be fed him through a valve every hour, this being the amount required by a normal adult while at work. The poisonous carbon dioxide from his lungs will be absorbed by a can of caustic soda fixed in another niche in the casting.

Another great difficulty of a diver working at extreme depths is believed to have been overcome by Leavitt, who has devised an electric lamp of three hundred candle-power. Leavitt will need three of these, and their glass globes have stood pressure tests equal to those of the manganese. Deep under the water the darkness is much deeper than is ever experienced on the surface of the earth, and it is not expected that even with these lights Leavitt will be able to see more than a few feet in any direction. Inability to get proper light has been a great stumbling block to many salvaging operations in the past.

Leavitt will use dynamite to clear a passageway to the strong rooms of the ship, and, of course, it cannot be known until an examination is made whether it will not be necessary to subject the Lusitania to even a severer torpedoing than that which sank her before she can be made to yield up her treasure. The treasure, if found, will be sent to the surface in clam shell buckets. It is known that there was $5,000,000 in specie on the Lusitania when she was sunk, and it is believed that an equal amount was lost in jewelry. In addition, there were the great sums carried by the passengers, most of which was turned over to the purser. Two passengers are known to have carried $175,000 between them, and the enthusiatsic salvagers look to a total haul of about $15,000,000 if all their plans succeed. It will be easy for Leavitt to drop over the side of the Blakely almost at the precise spot where the Lusitania sank. But will he find her at the bottom? Some authorities say that by this time the Lusitania, as a ship, has ceased to exist, that she has long since disintegrated under the pressure of the water and has been spread for miles along the ocean shore by the action of the tides.

Give the Binder Care.

The knotter mechanism of the binder is a complicated and delicate piece of machinery and should not be exposed to the weather. A heavy coating of rust on these parts causes most of the knotter trouble of the following year. If the machine must be left in the field for a time it is a good policy to cover the knotter part with a heavy coating of axle grease and tie an old piece of canvas over the binder head.

Binder canvases will not stand any particular amount of exposure and should be removed as soon as the machine is stopped. Crickets and mice quickly destroy the canvas and in some cases even eat the slats. One will be repaid for his time if all the canvases on the binder are well wrapped in heavy building paper and suspended on wires from the rafters in the granary or hay loft where they cannot be molested by insects or mice.

Antioch, in the fourth century, is believed to have been the first city to make any attempt to light its streets at night.

Garden of Eden Near the Arctic

Out of the North come many wonderful tales, but not many that rival the story told by Frank Perry, mining engineer, of Vancouver. He has spent fourteen years in the Arctic regions of the Northwest, between latitudes 57 and 63, and longitudes 122 and 131. He traveled light, using only four pack dogs, and made his food from concentrated extracts of moose meat. Being far from the usual run of river and lake traffic, he came into touch with only a few Indians, and even these had superstitions that kept them out of the great valley into which he accidentally wandered. This valley is a garden of Eden, a sort of semi-tropical Paradise surrounded by Arctic rigor, and is wonderfully rich.

Perhaps the most striking part of his story is the discovery of the Hot Spring Valleys, in all 200 miles in length and from 25 to 40 miles wide. Struggling up the side of a hill, with his two faithful dogs, with an Arctic gale driving chills through his almost exhausted constitution, he found when at last reaching the crest, this wonderful valley, the bottom of which was hidden from his gaze by a dense fog, the origin of which he at first was unable to understand. When he descended he found large lakes of almost boiling water, generating clouds of vapor, which forming the fog, protects the valley from the frosts and fosters vegetation. The soil is the richest he knows of, probably 100 feet deep with natural fertilization from the hot springs and volcanic minerals. In this valley Mr. Perry found large deposits of minerals with a high percentage of gold, silver and copper. He has sent a large number of samples of these deposits to be analyzed in various American universities, and he has in his possession documents showing the chemical composition of the finds.

The vegetation was exceptionally rich, not only in different forms, but in the size of growth. He found willows, the branches of which were fit to walk upon. Grasses had proportions double the size of those which we are used to see. And as a consequence, animals flock to the valley. "I saw rose bushes of the size of trees, with stems as thick as my forearm and so dense it was almost impossible to break through. Everything growing had an abnormal size, and sometimes I really did wonder whether I still was wandering in this world, or if I had ascended to a country worthy of the descriptions which made Dante immortal," the explorer remarked. Other features of the new paradise were birch trees 150 feet high, bending over and nearly touching the ground. During the winter there was no frost, the hot springs and lakes providing a protecting veil of fog. Mr. Perry also found iron and coal, the latter almost forming a separate mountain, one seam 800 feet across, while the largest iron ore seam measured about 200 feet in thickness. He also thinks he has found a quartz deposit free from overburden and which ought to bear development. "Why I claim to have traversed unknown country is because I know as a fact that the only human beings that ever are in these districts are the fur traders and they always use the rivers and waterways as means of transportation. I have met a few Indians, but have found they nurse a tradition that the valley is haunted by what we know as pre-historic animals. By a discovery I found out the origin of their fantastic belief.

"This part of the country has not been exposed to the destructive forces of glaciers, and I was not astonished to find footprints in sandstone of a three-toed monster. I also saw a number of bones of immense size, in remarkably preserved condition, north and west of the head waters of the Findley river. The bones are not fossilized and those exposed to daylight are sections of the spine and the hips." By excavation Mr. Perry thinks that a find would be made of much historic value. It is only in one valley that the engineer has seen signs of the muscular monsters which ruled the world thousands of years ago, and the situation of the remains suggests that some natural disaster closed them in this valley and drowned them. The creek, which has in modern time been flowing through the valley, has in its erosional action exposed the giants. Mr. Perry was from early age made familiar with the mining conditions in Montana and Idaho. He has always studied geology and the vast open spaces in the North were always the fields on which he used to let his imagination play in younger days. He is now through with the foundation work of his scheme.

Ragtime for Penguins.

Captain John Cadwallader, of Vancouver, British Columbia, who has just returned from South Georgia after a two years' hunt for whales, told the writer of a remarkable gramophone concert he gave in the Southern Seas, with thousands of penguins as his audience.

"One day," he said, "I took my gramophone into the open and began to play it. There wasn't a penguin in sight, but within a minute of the first record being started hundreds of birds appeared and walked in their slow, stately gait towards me.

"Very soon I had an audience of thousands. Several king or crested penguins sat within a few feet of me, and the ordinary species formed a number of circles. They listened with almost human interest to the music, and the lilt of ragtimes sent them shuffling and swaying.

"When my concert was over the penguins rose, bowed gravely as if to express their thanks, and walked off."

TWO BEAR STORIES.

How a Mother Rescued Her Captured Cub.

Two amusing bear stories, both vouched for by reputable eye-witnesses, are going the rounds of British Columbia. Forest fires in northern British Columbia this season have had a peculiar effect upon some of the wild animals of the woods, judging from some of the stories.

A fight between a fire-crazed bear and a mule in which the bear was worsted occurred at L. Mason's ranch at Bednesti, B.C. The forest fire routed the bear from its lair, and in its dash from the flames into the open country its collided violently with a jack-mule. The bear was promptly stretched out on the ground by a double tattoo from the capable hind hoofs, and the mule calmly resumed its interrupted grazing.

Thoroughly angered, the bear picked itself up and cautiously approached the mule from a different angle. The huge paw was brought down with a resounding twack on the mule's ribs. This was unfortunate. The hoofs were again brought into play, after a quick, accurate manoeuvre for position, and the fight was called off so far as the bear was concerned. Mr. Mason, who had witnessed the unusual encounter, dashed to the house for a rifle to finish the bear, should any life be left. Before he could get back to the scene, however, bruin managed to get groggily to his feet and return to the less exciting environment of the forest fire.

A fire patrol ranger is sponsor for another bear story. While making a survey in the mountain district he came upon a young cub suffering from severe burns on feet and body. The youngster was whimpering from the pain and the forester took pity on it, lifted it into his car, and there made it fast with some rope.

The patrolman started on his journey only to discover that the mother bear had appeared and was in hot pursuit. As the track ran uphill at this point, the bear, making long strides, gained steadily, and the need for strategy was clearly indicated. The forestry book of instructions does not cover a situation such as this, but the ranger was resourceful and decided that the best plan would be to throw the cub overboard.

His attempts to untie the knots on the lashings which secured the youngster to the machine however, proved futile. Pursuer and pursued came to a yet steeper grade, with the advantage all with the former. Finally, with one mighty effort, the old bear threw herself on the back of the car, holding on by her claws and paws.

This is where the forester decided to retire in favor of the enemy. He dove off the car, and regained his feet in time to see it continuing its journey eastward, with a mother and child happily reunited as its passengers. Later the automobile was found, run down and everything intact, except the side of the seat where the cub had been tied, the old bear having torn it out to release her offspring.

A Mud Turtle's Nest.

The little mud turtle is a common inhabitant of the frequent sluggish creeks of this northern country. It possesses to so marked a degree the qualities differentiating a turtle from all other back-boned animals! Safe within the fortress of a shell, by which it is protected as completely as any species but the terrestrial box turtle, it lives a life of serenity and monotony, supposedly as free from worries as that of any mortal creature.

When tired of contemplating the shimmering dragon flies, the spreading ripples in the wake of a chance muskrat skirting the reeds at the water's margin, it has but to draw its head beneath the surface and sink down through the concealing water weed to blend with the velvet mud at the bottom of the creek, thus in peace and harmony with its surroundings living out its allotted years, however many they may be. Certainly some individuals of this species, with green water moss growing on their mud colored backs, seem old indeed.

Near high noon of a summer day, with the wind in the south and sun burning through a light haze, a female mud turtle had climbed upon a thinly grass-grown point of land, scraped an excavation in the sandy soil with her hind feet, and was laying or preparing to lay her eggs therein. A naturalist paused but an instant to make note of the spot and then moved quickly away so as not to interrupt the procedure. Some hours later he returned with a spade. Scarcely an indication remained that the ground had been broken, but, digging down, six eggs were brought to light. They were quite unlike the long, leathery shelled egg of the painted turtle or the spherical eggs of the snapping turtle. About one inch in length, a little more than one-half as broad, they had hard shells like the eggs of a bird, and were pretty, translucent pinkish white in color.

Learn to Laugh.

Learn to laugh: a good laugh is better than medicine.

Learn how to tell a story; a good story, well told, is as welcome as sunshine in a sick-room.

Learn to keep your troubles to yourself; the world is too busy to care for your ills and sorrows.

Learn to stop grumbling; if you cannot see any good in the world, keep the bad to yourself.

Learn to hide your aches and pains under pleasant smiles; no one cares to hear whether you have headaches, earaches, or rheumatism.

Learn to meet your friends with a smile; a good humored man or woman is always welcome, but the dyspeptic is not wanted anywhere.

You will pass through this world but once. Any good thing, therefore, that you can do, or any kindness that you can show to any human being you had better do it now; do not defer or neglect it.

If you don't exaggerate you never get believed.—Mr. Rudyard Kipling.

Toronto's First Theatre

Few of the remaining landmarks of the Toronto of the nineteenth century carried with them such a wealth of historic association as did the old Royal Theatre, on King street, which recently fell a prey to flames. Completely surrounded by stores, factories and warehouses, the big structure which was once counted one of the finest theaters on the continent, had been practically forgotten by the city which once used to throng its foyer. Hidden away at the end of a dingy alleyway which bears the near romantic name of Theatre Lane, the one-time home of the drama had become nothing more than a temporary resting place for beds and hats.

While the building could not itself claim the honor of being the first of the species to establish in Toronto, it was the direct lineal descendant of the theatre which saw the birth of legitimate drama in that city. It stood on the site of the Royal Lyceum which, erected in 1848, was Toronto's first real theatre. Out of the ruins left by a former fire which occurred in 1883, the unfortunate dwelling of beds and hats was fabricated. Standing, as they did, on the same site, parent and child have always been counted as something more than members of the family by those familiar with Toronto's early theatrical history.

And truly the family history of the two buildings is enough to turn the most snobbish modern theatrical palace green with envy. They saw melodrama in the hey-day of its prosperity. On their boards Toronto's first stock company made its bow. There it was that the colonials of Upper Canada had their first taste of the opera. There it was that Denman Thompson, Jas. Wallack, Barry Sullivan, Fanny Kemble and other famous Broadway stars of the '50s and '60s tried out their latest pieces "in the provinces." Those walls alone know the secret of the mysterious disappearance of one Kero, an Italian manager, whose fate strangely resembled that of Ambrose Small, the missing theatrical magnate, the story of whose vanishing set a whole continent talking.

Perhaps no one incident in the history of the two Royals is more striking than that of the disappearance of Kero. Back in 1858, during the inter-regnum between the fall of the Nickinson Stock Company, J. C. Myers took over the theatre and appointed Kero his manager. An inveterate poker player, the Italian manager was very fond of "flashing" a healthy roll of banknotes. That detail of the story is vouched for by Ted Gegg, who at the age of 83, recalled the once notorious story.

Kero lived in the theatre. It was common knowledge that sessions over the cards which developed in the back room often lasted till early morning put the flickering gas light to shame. One night Kero and two of his associates retired for their usual evening's enjoyment. Kero has never been seen since. His disappearance was as completely baffling as that of Ambrose Small. Somehow or other the public became convinced that he had been dropped over Niagara Falls; suspicion centered on his two card-playing friends, but no facts were discovered to substantiate the conviction. As in the case of the latest mystery, digging operations were instituted at various points in the city but they proved as futile as those which sought to discover the body of Kero's twentieth century prototype.

From the very first misfortune and success played strange pranks with the theatre and its occupants. In 1848 John Ritchie braved a cholera plague which was then raging in Toronto to build the city's first theatre. John S. Potter became manager. A man who always had a tear in his eye, Potter left many unpaid bills behind him. A Philadelphian, Brown by name, who undertook to play "The Golden Farmer," succumbed to the ravages of cholera, and found a grave in the Potter's field.

For four years the new venture struggled along, providing entertainment that was intermittently regular. Then, in 1852, came the rise of the legitimate drama. John Nickinson established a stock company, the fame of which spread far beyond the borders of the city, and which succeeded in weathering the adversities of five successive seasons.

The programs varied from straight drama, comedies and musical comedies, but they were invariably reinforced by between-act song and dance turns. Prices in those days reflected the social status of the various classes of the theatre patrons. A box cost $4, a seat in the dress circle 50 cents, and one in the family circle 25 cents. Prior to the introduction of the decimal coinage prices ranged from three and ninepence for a dress circle stall, to one and three for a seat in the gallery.

The stock company gave way to what was then known as an opera company, and Cooper's and Holman's Opera Companies took over the theatre in turn. Cooper was unlucky, Holman was more successful, but he, too, finally was forced out by high rentals.

In 1872, Mrs. Morrison, a daughter of the noted Nickinson, took over the Royal Lyceum for a week, after which she opened the present Grand Opera House, then known as the Royal Opera House. The year 1886 saw its last audience file out through Theatre Lane. A printing firm then took over the building, but the last blow came when the prosaic bedstead and the very useful hat claimed the old auditorium as their own.

The pyramids of Egypt are 38 in number, and stretch for about fifty miles along the western reach of the Nile valley.

CANADA'S FUEL INDUSTRY.

Site of St. Maurice Forges Will Be Marked.

The Canadian National Parks Branch of the Department of the Interior has decided to mark, as an historic sight worthy of preservation, the old St. Maurice Forges, which constituted the only important Canadian industry during the French regime and lasted through the England period up to the years 1880. The St. Maurice Forges, situated on the St. Maurice river about seven miles from Three Rivers, were found in 1730 by Poulin de Francheville. Here the first Canadian stoves were manufactured, and for many generations the Canadian people were supplied with porridge pots, axes, nails, hammers, spades and shovels from the forges of St. Maurice. There remain now but a few crumbled ruins of the furnaces and of the once substantial "habitation" of the managers, together with a chimney of the forge, which still stands in lonely dignity in the bed of a wooded valley. Around the site of the old forge there are now a few modern houses where once a village of 400 to 500 residents existed with industrial and commercial activities which constituted real community life.

The history of the forges has been set forth by Dr. Benjamin Sulte, F.R.S.C., as the sixth volume of the Melanges Historiques, recently published by G. Ducharme, Montreal. The story of the old forges will thus be preserved in literary form, and the monument to be erected by the Parks Branch will be a visible reminder for all time of an interesting chapter in the romance of Canadian industry.

Writing recently on the forges Dr. Sulte reflects rather sadly: "And now nothing remains to recall these memories but a high chimney—mais non, tout est oublie."

Yet the industrial inspiration of these old Canadian forges surely remains and the aspirations of its founders are still alive. In Toronto there are three foundries for the manufacture of Canadian stoves and there are others in thirty-eight other cities of Canada. The first founders of the St. Maurice Forges had great trouble to obtain permission from France to found a colonial industry. Under the old French regime, says Dr. Sulte, an order of things existed—as in the colonies of England, Spain and Holland—based upon the principle "all for the Mother Country." Nothing must be done by the colonies which would affect the trade monopolies of the merchant companies of France. These wanted nothing from Canada but furs, and they wished to pay with their own goods.

Eventually, however, permission was given to one Poulin de Francheville to establish a foundry at St. Maurice, and even some financial aid was sent from France. Dr. Sulte looks at this incident with an ironic twinkle. For a long time, he says, he could not understand it, but at last light came. Possibly cannon, bullets and war apparatus generally could be made cheaper in Canada than in France, and, therefore, permission was given to manufacture iron.

The monument to be erected by the Canadian National Parks will take the form of a cairn composed of stones from the ruins of the old St. Maurice Forges. A bronze tablet will be placed upon the monument containing the inscription in French and English: "These forges, established in 1730, by Poulin de Francheville, were the foremost industry under the French regime and continued in operation until 1880."

WILL HONOR THE PRINCE.

Unique Features Are Arranged for the Toronto Exhibition.

Three years ago the Prince of Wales visited Canada. He paid a visit to Toronto, and his presence at the opening ceremonies of the Canadian National Exhibition drew a record crowd to the grounds. Probably never again will such a gathering be seen at that function. This year, the most popular young man in the British Empire will again be a feature at the Exhibition, although he cannot be present in person. A great spectacle has been planned which will be known as "The Prince of Wales Indian Durbar," based upon the recent world tour of the heir to the throne. Between the time of his departure for the Far East in October last and his recent arrival home, H.R.H. the Prince of Wales visited 106 places in India, Burma, Ceylon, Singapore, Hong Kong, Japan and Egypt, and covered by sea and land a distance of 49,908 miles. Probably no royal personage has ever achieved such a record in such a period of time, and few human beings have undergone experiences of so varied a kind. The manner in which this beloved ambassador of empire has responded at all times to the demands made upon him has won admiration for him the world over. It is hoped that Canadians will feel that the magnificent Durbar production is a fitting tribute to him. One interesting item in connection with this event was the desire of young Canadians to play the role of the prince in the pageant. A large number of youths who thought that their personal appearance fitted them for the part applied to the showmen who were putting on the spectacle.

The latest addition to the features of the exhibition is Music Day. On that evening a choir of 1,000 voices will be assembled in the finale of the Prince of Wales' Durbar. It is to be conducted by Mr. H. A. Fricker, leader of the Mendelssohn Choir, and among the choristers will be representatives of the Mendelssohn Choir, National Chorus, Oratorio Society, Orpheus Society, Masonic Chorus, Toronto Festival Chorus, Scottish Chorus, Harmony Male Choir, Bell Telephone Chorus, Welsh Choir, High Park Masonic Choir, Earlscourt Choral Society, Eaton Choral Society and 200 Church Choirs.

On the same day, a band competition is to be held when the title "Champion Band of Canada" will be awarded. There will be cash prizes ranging from $200 to $1,000. This is something quite new among the events at the Fair.

DO WOMEN WORK AS HARD AS MEN?

Yes. And They Must Keep Well and Strong

Two Interesting Letters

Toronto, Ontario.—"When my husband was called back to England in 1914 I took Lydia E. Pinkham's Vegetable Compound to strengthen me so I could work. I had a trouble that used to make me weak, but I am able to do my work now and am perfectly satisfied with your medicine. I still get it at the chemist's and I strongly recommend it to anybody I hear of suffering as I did. You may publish this if you wish." —Mrs. E. Hornblower, 899 Yonge St., Toronto, Ontario.

I Did Not Feel Like Working

"I was in a general run-down condition with a weak back and a tired feeling so that I did not feel like working. My mother was taking Lydia E. Pinkham's Vegetable Compound and recommended it to me, so I have taken it and my back is better and I am now able to do my work. I recommend the Vegetable Compound to my neighbors and you may publish my letter."—Mrs. Josephat A. Grenier, Box 47, Carbon, Alberta.

Lydia E. Pinkham's Vegetable Compound should be taken when you first notice such symptoms as nervousness, backache, weakness and irregularity. It will help you and prevent more serious trouble. Give it a fair trial.

Fighting Drug Traffic.

The Canadian Government is making vigorous efforts to cope with the illicit drug traffic on the Pacific Coast, H. S. Beland, Federal Minister of Health and Soldiers Civil Re-establishment, recently stated. "Under the legislation passed at the recent session of Parliament illicit drug [illegible] is punishable by as severe penalties as anyone could wish," he declared. "Under this legislation foreigners convicted of selling drugs may be deported. And it is significant that out of 834 convictions in connection with drugs last year over 400 cases were those of Chinamen."

Favored Shade.

Pale yellow georgette over white, the georgette embroidered with white soutache braid, is one of the popular combinations of the moment. The yellow is not so deep as the dent de lion of early spring nor yet so faint as the semi-ivory. It is more a lemon yellow, refreshing and summery in appearance, and looking its best when contrasted with clear white. With these gowns, which are usually made of organdie, go hats in the same shade, of crinoline trimmed with fair-sized silk sunflowers in a deeper tone.

Sale! Sale!

QUALITY HOLDS OUR TRADE, AND GOOD GOODS AT LOW PRICES.

Remember this, we do not offer you junk, no cheap trash, or rejects, sub-standards that have been bought especially for sales. But on the contrary, we offer you our regular stock, bought for our regular trade, which means the best in every line. Compare Quality for Quality, Price for Price. Competition may continue to insinuate and "claim" but comparison of values is the true test. Our aim is to please customers or money back. "One look is better than two listens."

An eyeful of perfection outweighs a mouthful of praise. That is why we want you, yourself, to see the great values offered in this gigantic Slaughter Sale. This sale is a sale of more than common meaning. The fact that we have a reputation of carrying strictly a quality stock, and we would rather use small profits to win a reputation than use our reputation to win big ones. The bed rock of service is value-giving, and value-giving at a time when people need it most. You want Quality that is right at costs that are reasonable. We are featuring both, preferring to live up to our reputation than on it. Asking you to be the judge yourself. So we are laying our cards on the table.

Girls' Fleece-lined Combinations, size 28 to 32, reg. $1.50 values, at 90c. suit.

We have something special in Back Bacon. Give us a call. Also choice French and June Peas.

Address and Presentation.

On Monday evening of last week a goodly number of friends gathered at their home on Mrs. John Higgins, Conway, to spend a pleasant evening, and to show their appreciation of the valuable service to the community before they leave for their new home in Hamilton. At the close of a very pleasant evening, after which a dainty lunch was served by the ladies, Mrs. Wilfred Haight read an address and a gift was presented to them.

A World's Wonder.

Publishers of Europe and America have expressed surprise that a paper of such wonderful value as the Family Herald and Weekly Star of Montreal can be produced at the subscription price charged. It is not only the enormous size of the Family Herald that excites the wonder of the world, it is the vast variety and the super-excellence of its contents. The great success of the Family Herald of Montreal has resulted in securing for it the very best talent in all its departments.' This is a measure of its progressiveness. To say that the Family Herald is in a class by itself without a rival is to put it mildly. The publishers we understand will send sample copies free on receipt of postal card.

Red Cross Work for Fire Sufferers.

The Napanee Red Cross Society have already made a shipment of goods to the Northern Ontario fire sufferers, and other shipments will be made as soon as prepared. The ladies will meet each evening for work at the home of Mr. and Mrs. F. F. Miller, who have kindly given the use of their home for the purpose. All donations may be sent to Mr. Miller's home. The need for every kind of supplies is urgent, as the weather in Northern Ontario as turned quite cold and if supplies of clothing, bedding, etc., are not immediately forthcoming much suffering will result. Money is needed to purchase materials, as well as clothing of all kinds in good condition. Every worker will be made welcome whether members of the Red Cross or not.

McConnell-Tate.

On Wednesday, October 4th, 1922, at high noon, at the residence of the bride's parents, Maple View Farm, Selby, Ont., the marriage of Miss Ethel Gertrude, youngest daughter of Mr. and Mrs. Jos. Tate, to Mr. A. Ross McConnell, only son of Mr. and Mrs. Wm. McConnell, of Victoria Int., was solemnized by Rev. T. H. P. Anderson. The rooms were very tastefully decorated with flowers and foliage. While the wedding march was being played by the groom's sister, Mrs. E. Richmond, the bride, prettily attired in palest blue and white satin and lace and corsage boquet of roses, and wearing the groom's gift, a beautiful row of pearls, entered the parlor on her father's arm and took her place beside the groom beneath an arch of foliage and flowers. After congratulations, and signing of register, a dainty dinner was served. Mr. and Mrs. McConnell left by motor for Napanee and took the train, amid showers of confetti and good wishes for a trip to Toronto, Barrie and Bowanville. The bride travelled in a suit of navy serge, with hat of velvet and duvetyn to match. Upon their return they will reside at Victoria, Ont., where the groom is a prosperous farmer.

"THE TIME OF HIS LIFE."

This play will be given in Grace Church S. S. Room, Thursday evening, October 26th, by the young people, under the auspices of the Mission Circle. Fuller announcement next week.

Hunter-Peters.

The marriage was solemnized of Miss Reta Irene Peters, daughter of Mr. W. P. Peters, Kingston, to Mr. Wm. D. Hunter, of Napanee, son of Mr. W. H. Hunter, at 10.30 a.m., Thursday, October 5th, by the Rev. J. D. Boyd. After the ceremony the young couple crossed to Cape Vincent, then motored to Windsor, Vermont and other points south. On their return they will take up their residence at Napanee.

A New Use for Poplar.

A method has been discovered by the Forest Products Laboratories of Canada, whereby Canadian poplar can be used in the manufacture of cigar boxes instead of the cedrela from Cuba, which generally cover up imported Havanas, and has been regarded as the sign manual of a good cigar. Several Canadian cigar manufacturers have already started making boxes from poplar.

James Aylsworth Passes.

James Aylsworth, Police Magistrate for Addington, Township Clerk of Sheffield Township, and Postmaster at Tamworth, passed away very suddenly on Saturday night about eight o'clock. Deceased had been a resident of Tamworth for a long number of years and identified with public business for years. Few township clerks in the Province had as good a grasp of township business as the late Mr. Aylsworth, and his place in the public life of Sheffield will be hard to fill. Deceased was also prominent in the Masonic Order and a charter member of the Tamworth Masonic Lodge. The funeral takes place this (Tuesday) afternoon. Mrs. Holmes and Miss Aylsworth, Napanee, are sisters of deceased.

Kennedy—Finn.

The church of the Annunciation, Chippawa, was the scene of a pretty wedding, at 9.30 Tuesday morning, Oct. 3rd, when Miss Anna Bernice, youngest daughter of A. C. Finn and the late Mrs. A. C. Finn, Enterprise, became the bride of James Kennedy. The ceremony was performed by the Rev. Father Farrell, in the presence of the immediate friends and relatives. The bride looked a picture of girlish loveliness, as she entered the church leaning on the arm of her father to the strains of the nuptial march, played by her cousin, Miss Kathleen Finn. Mr. Railton, who with her sister, Miss Marie, rendered several appropriate solos during the mass. During the offertory Mr. Railton sang Charles, sang "O Salutaris" in excellent manner. Miss Tessie Murray, Railton, also a cousin of the bride, did ample justice to the "Ave Maria." The bride wore a tailored suit of navy velour with black plush picture hat, trimmed with uncurled ostrich feathers. She carried her bouquet of carnations and maiden hair fern, and was attended by her sister, Miss Lauretta, who was also dressed in a tailored suit of brown tricotine, with silver grey hat. The groom was supported by his brother, Daniel. After receiving the congratulations of numerous friends the bridal party motored to the home of the bride's father, accompanied by Rev. R. T. Farrell, where a sumptuous wedding dinner awaited them. Dinner was served to about fifty guests.

Baseball Goods.

A complete line of Bats, Balls, Gloves, etc. DAVY & ALLISON.

MILLIONS POINT WAY TO HEALTH AND HAPPINESS

Bring Cheerful, Inspiring And Hopeful Messages To Those Who Are Sick In Body And Spirit.

Every human being is entitled to health, happiness and success. It is positively wrong to be satisfied with illness. Do not fold your hands and accept ill health as something you cannot avoid or overcome.

Tens of thousands of men and women from all parts of the country have testified that life has been made worth living to them after they had almost given up hope. These are the fortunate ones who have been restored to health and strength by the use of Tanlac, by far the world's most celebrated tonic medicine.

They all agree that Tanlac brings a feeling of new life and energy to every portion of the body and sends the blood tingling through the veins. The body becomes ruddy with the glow of health, the mind casts off its drowsiness and becomes once more alert and active ; there comes new life, new energy and a new feeling of ability to do things never thought of before.

Join to-day, the vast army of those who have been made healthy and strong by Tanlac. Throw off the poisons that are ruining your digestion, weakening your strength, wrecking your nerves, making your liver torpid, causing headaches, backaches and crippling you with rheumatism and other destructive diseases.

Bring the color to your cheeks and the sparkle of health to your eyes. Be robust, strong and sturdy. You can do this and you owe it to yourself, your future, your family, to act now.

Get Tanlac from your nearest druggist to-day and watch how quickly you begin to eat better, sleep better, feel better, and work better.

Paint Now !

Fall is an excellent time for painting. It pays to preserve your buildings from decay. Elephant White Lead, Boiled Oil, Glass, Putty and Martin-Senour 100 per cent. pure paints always in stock.

WILSON'S HARDWARE.

Football Game.

WEDNESDAY and THURSDAY

Arrow presents a Ben Wilson special attraction in "CHAIN LIGHTNING," starring Ann Little in a faster than lightning race track story that will keep you on the edge of your seat till the last foot of the film is shown.

Also a special Christie Comedy, "LET ME EXPLAIN."

And the last episode of "STANLEY IN AFRICA."

FRIDAY and SATURDAY

How often have you asked to see something new, something different, new faces, new scenes in a motion picture ? Here is the different picture, a modern drama of carnival time in Venice —actually filmed in Italy, on those mysterious, romantic old Venetian canals—beautifully, superbly produced, a gem of screen art, and a sensational dramatic achievement. Don't fail to see it, "THE CARNIVAL."

Also a Buster Keaton Comedy, "THE GOAT."

And next episode of "ROBINSON CRUSOE."

MONDAY and TUESDAY

Marshal Neilan offers four stories with fourteen famous film folk in "BITS OF LIFE." Newest idea in pictures. Doesn't keep you waiting one minute. He has brought the magazine idea to the screen. See him in his best in "Bits on Life."

Also Mack Sennett in a special Comedy, "ON PATROL."

BAYER

OK

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds, Headache, Rheumatism
Toothache, Neuralgia, Neuritis
Earache, Lumbago, Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

GILLETT'S LYE

Comparatively few people realize to what extent Gillett's Lye can be used to advantage in every home. For instance, with one can of Gillett's Lye and five and a half pounds of lard or grease, ten pounds of good hard soap can be made. Use one tablespoon Gillett's Lye in gallon of water for cleaning and disinfecting refrigerators, sinks, garbage cans, tiled floors, baths and toilets.

Useful for over 500 purposes.

INDIANS ARE DEFIANT

Reject Proposal Made to Them by Dominion Government.

Canadians Are Regarded by Them as Foreigners, and the Redmen Claim That They Are Neither Citizens of the Dominion or Subjects of the King—A Special Tribunal Suggested.

BRANTFORD, Ont., Oct. 16.—The reply of the Six Nations Indians Council of Chiefs to the recent offer of Hon. Charles Stewart, Minister of the Interior, is in the negative. The suggestion for settlement of the status of the Six Nations by reference to three judges of the Supreme Court of Ontario is repudiated and a contra suggestion of an arbitrator named by each side without conditions and those two nominating a third, put forward. They this time declare that they are not British or Canadian subjects and are subject to no laws except their own. The letter reads:

"The council affirms the political independence of the Six Nations in all matters of home rule within their remaining Grand River lands, and therefore refuses to acknowledge the Six Nation people to be British subjects as now claimed by the Canadian Government. The opinion of Mr. Justice Riddell on that question is not regarded as binding upon our people. His view, reached after our true status had been directly called to his attention by counsel amicus cariae confirms the wisdom of the order-in-Council of November 22, 1920, to the effect that the submission of that political question to the Canadian judiciary for adjudication would be a hopeless project on the part of the Six Nations and in that view this council concurs. For that reason we must finally decline the renewed proposal of your Government that a commission of Canadian judges shall with our consent now determine the issue between us on that question.

"In our petition to his Majesty of August 25, 1921, we petitioned for exercise of the protection solemnly pledged to us as a separate people. If the reply of the Imperial Government to that petition was intended to mean that the Dominion Government was the sole judge of our right to that protection when our liberty of home rule was openly threatened by the Dominion Government, then this council denies the validity of the reply and denies the competency of the Imperial Government to dispose of that question.

"The council regrets that your Government makes no offer to confer with us on readjustment of our relations so as to meet the new conditions which have arisen since our settlement on the Grand River lands. We note the failure of the Government to appoint an auditor to act with one already appointed by us for investigation of our funds now held by your Government.

"We appreciate the nature of your communication as a warning that your Federal Government will come to the aid of the Ontario authorities in imposing your foreign laws upon us. We cannot accept your assurance that those laws, if imposed upon us, spell no jeopardy to us in permanent tenure of our lands. Of our welfare in that respect we must and do judge for ourselves.

"If we must deem the door closed on your part against adjustment of these differences by a competent and impartial tribunal, we shall strive nevertheless to find protection in such a tribunal encouraged by the belief that the justice of our case will open the way..

"We are prepared to leave to such a tribunal the determination of any right or demand, political or property which either of us shall assert against the other and we indulge the hope that you may agree to submission thereof to an arbitration to be composed of one member chosen by you without restriction and one chosen by us in the same manner, and the two so chosen to select a third to make an arbitration of three, the compensation whereof shall be equally borne by the parties.

"We cannot believe that your Government will send physical force within our peaceful homes, either to seize our people, or to impose its foreign will upon us. If we are wrong in that view it must be because you send men to crush us who had first to forget the faith pledged by British treaty and to forget our fidelity to your British neighbors."

BRITAIN KEEPS FAITH

Premier Lloyd George Defends Policy in Near East.

People Trusted British Promise to Defend Them Against Indescribable Horrors, Says Prime Minister, and the Promise Could Be Trusted—Fiery Speech In Manchester May Be Prelude to Election.

MANCHESTER, Oct. 16.—In the city of his birth, before the Manchester Reform Club, David Lloyd George on Saturday defended the Near East policy of his Government. He maintained it stopped the Turks, caused them to "cool off," and thus averted war, saved the endangered minorities, and protected the freedom of the Straits.

The Prime Minister followed his favorite strategy of "offensive defence." He scored his critics in both parties—the die-hards in either camp. He spoke as a Liberal to Liberals, reminding the gathering that Liberalism had not brought him up to repeat each morning the litany of the cynic: "Am I my brother's keeper?"

In the hall where Gladstone had often spoken he scathingly scored the great Commoner's son. Referring to Lord Gladstone's criticism of a policy designed to prevent the unspeakable Turk "from crossing into Europe and committing atrocities upon Christian populations," the little Welsh statesman roused his audience to remarkable response with his stinging, startled, sarcastic exclamations at the close of each sentence commenting upon the son's position — "a Gladstone!"

Lloyd George has aged since he took control of the Government, seven years ago. His hair is much whiter. His brow is lined. His manner is more serious. But he has all the fire—all the energy and vivacity—of earlier years. His speech undoubtedly had been carefully prepared. He laid a number of notes on the small table before him when he rose to speak. But once he was on his feet and started he seemed to forget all about them. His sentences had all the effect of spontaneity. His eyes twinkled as he told his audience that he was "not the sort of Christian to allow himself to be massacred by Turks and pro-Turks," and his naive confession that "I am a fairly pugnacious animal" was greeted by a roar of laughter.

The Premier failed to give any clear intimation as to his course for the future—whether he planned a general election, contemplated resigning, or proposed to carry on till next year.

If a change came, he said, no one would welcome it more than he, but he could not resist visualizing his vindication in seeing "the tangle get a little worse and the fumbling a little more pronounced." There would be, he added, "a little satisfaction of the human kind in looking on."

It was in closing, however, that the flash of fire passed from the Premier and his words grew serious with responsibility. He proposed to play no personal or party game, he declared quietly. If, in consequence, he was to be "driven alone in the wilderness," he would remain proud that "it was given me in the last days and weeks of my Premiership to invoke the might of this great Empire to protect from indescribable horror men, women and children by the hundred thousand who were trusting to the plighted word of France, Italy and Britain as their shield of defence — and who are thanking God at this hour that Great Britain has kept faith."

Steals to Feed Bride.

WINDSOR, Oct. 16. — Edward Tremblay, 16 years old, Crawford avenue, stole nine bags of cement to buy food for his bride of three months, he told Magistrate Gundy in the Police Court Saturday.

Touched by the boy's story, M. N. Mousseau, inspector of Provincial Police, who was present, promised to make restitution.

Tremblay and his bride, who also is 16, were married in June, Tremblay said. She was taken to Hotel Dieu several weeks ago, and he was unable to find work, so he took the cement and sold it for $8.69.

Tremblay told the court his mother was sick at his home, too, and there was no food in the house when he was tempted. Sentence was suspended.

Remove Ban on Notes.

OTTAWA, Oct. 16.—Within three months the ban placed by the Post Office Department upon the sending of postal notes to the United States will be removed. That could be done now but for the fact that all the postal note forms now in the use of the various offices in Canada have printed across them these words: "Not to be remitted to the United States."

To call all this in and print an entirely new stock would involve a large expenditure, so it is the intention of the department to await the exhaustion of this supply, which should be accomplished in three months, before permitting the sending of postal notes to the United States, now that Canadian money is at par in the neighboring nation.

Visits Forts of Liege.

BRUSSELS, Oct. 16. — King Emmanuel and Queen Helen of Italy left for home from Liege Saturday, where they spent the afternoon with King Albert and Queen Elizabeth of Belgium, visiting the fort, which Gen. Leman, the defender of Liege, held so long against the German onslaught in 1914.

SIMS LEAVES NAVY.

American Admiral Was Good Friend of Our Empire.

NEWPORT, R.I., Oct. 16. — Rear Admiral William S. Sims concluded his services as an active officer of the navy on Saturday, and departed from the Naval College and training station.

Sunday was the admiral's 64th birthday, the age limit for active service.

After reading his orders of detachment to his staff and college class, Admiral Sims shook hands with all of the officers, who had been lined up by Captain F. T. Evans, and, then, escorted by the officers, passed between two long lines of sailors to the admiral's barge. Officers and sailors cheered him as he boarded the launch. As he was "piped over" the saluting battery on the Old Constellation boomed out a salute of thirteen guns, and the admiral's pennant came down for the last time.

Officers and men of the naval hospital and naval torpedo station lined the water's edge at attention as the launch passed down through the harbor on its way to the Government landing here, and at this place the admiral was greeted by Col. W. R. Doores of Fort Adams, some of his officers, a guard of honor, and the fort band.

While all of these formalities had been going on, one of the big naval seaplanes had been circling about in the air over the station and harbor.

MONARCHS ARE CROWNED.

Coronation Ceremonies Were Held In Roumania.

ALBAJULIA, Roumania, Oct. 16.—King Ferdinand and Queen Marie were solemnly crowned Sunday in the vast public square amid the plaudits of thousands of picturesquely-dressed Roumanians. The ceremony was carried out without incident.

Promptly on the conclusion of the church service, a procession was formed, and the sovereigns, escorted by the Duke of York; Prince Paul of Jugo-Slavia, the Duke of Genoa, the Infante Alfonso, Marshal Foch and the foreign delegations, and, preceded by the Metropolitan and bishops, marched from the church to the richly decorated dais in the center of the square.

Stands had been erected around the square for the high personages of the kingdom, and the rest of the space was dense with spectators.

As soon as the sovereigns had taken their places on the dais, the President of the Senate received the crown from the President of the Chamber and placed it on the head of the king. The king, in turn, crowned the queen, who knelt before him. The king and queen were then clothed in the royal mantles and other insignia.

The procession was loudly acclaimed at the conclusion of the ceremony, Marshal Foch, in particular, getting a special ovation.

Cure for Consumption.

PARIS, Oct. 16.—An alleged cure for pulmonary tuberculosis has been explained before the Congress of Medicine, being held in Paris, by Dr. Arnold, who claims he has applied his treatment to hundreds of bad cases and effected definite cures. Dr. Arnold's method consists of a system of inhalation by patients of appropriate medicinal elements carried straight to the diseased lungs via the bronchial tubes. High pressure vaporizers are used. The patient sits in a box and volatile medicinal particles suspended in the vapor passes through a tube which the patient holds in his mouth. Dr. Arnold declares daily sittings of an hour soon produce surprising improvements and finally a cure.

Winona Man Killed.

APPIN, Ont., Oct. 16. — Frank Nelson, of Winona, Ont., was killed here about midnight Saturday on the Grand Trunk Railway. It is believed that he fell from a freight train and was stunned and that another later train ran over him.

Partridge Season Opens.

NORTH BAY, Oct. 16.—Saturday marked the official opening of the partridge-hunting season, but owing to the recent drives of provincial officers against gun-toting on Sundays the woods were deserted.

The beautiful weather promises to bring out hunters in hordes during the coming week. The partridge this season have been reported in tremendous numbers. It is believed that much of the game from the woods north of New Liskeard was driven south by the fires.

Youths Burned to Death.

ST. JOHN'S, Nfld. Oct. 16.—Eddie Payne, 21, and Daniel Payne, 13, were burned to death recently in their camp at St. Paul's Inlet, Cow Head, according to letters arriving here. As far as is known the victims fell asleep in their camp after a day spent at haymaking. Later their charred bodies were found amid the ruins of their burned camp by their father.

Fighting In Fiume.

LONDON, Oct. 16.—Fighting has broken out between the D'Annunzio legionaires and the Zanella forces in Fiume, says a Rome message to the Central News. An Ancona message states that Italian destroyers have been despatched to prevent the departure of Fascisti forces from Zara for Fiume.

Near East agreement gives satisfaction to Moslems in India.

Glenmoor Is Aground.

MONTREAL, Oct. 16.—The steamship Glenmoor grounded on a mudbank in the St. Lawrence river near Longue Pointe Sunday morning, and at a late hour, despite the efforts of tugs during the day, was still ashore. She will probably be released to-day.

Two hundred and seventeen people leave burning ship in mid-Pacific Ocean.

CHICAGO LIVE STOCK.

CHICAGO, Oct. 16.—Cattle, 7,500; compared with a week ago, strictly choice and prime native beef steers, 15c to 25c higher, top 40c higher; lower grades mostly steady; spots higher; beef cows and heifers, 15c to 25c higher; spots up more; canners and cutters about steady; bulls, 35c to 40c higher; veal calves steady to 25c higher; stockers, strong to 25c higher; feeders about steady; stockers and feeders, $6.25 to $7.50; beef cows and heifers, $4.25 to $7.25; canners and cutters, $2.90 to $3.50; veal calves, $10 to $10.50.

Hogs, 8,000; slow, around steady; bulk desirable, 230 to 300-lb. butchers, $9.50; 170 to 200-lb. averages mostly $9.10 to $9.25; bulk packing sows, $7.75 to $8.40; heavy, $8.65 to $9.45; medium, $9.15 to $9.45; light, $8.90 to $9.35; light lights, $8.75 to $9; packing sows, smooth, $7.80 to $8.60; packing sows, rough, $7.35 to $7.90; killing pigs, $8.50 to $9.

Sheep, 4,000; mostly direct; compared with a week ago, native lambs, strong to 15c higher; fat western lambs, 25c to 35c lower; sheep, steady to strong, closing top native lambs, $14; bulk better grades, $13.50 to $13.75; bulk fat western, $13.60 to $14; fat heavy ewes, $3.50 to $4; lighter weights up to $6.50; best western feeding lambs, $14.

BUFFALO LIVE STOCK.

BUFFALO, N.Y., Oct. 16.—Cattle, 325, steady.

Calves, 250, steady, $5 to $13.50.

Hogs, 3,200, [illegible] $10 to $10.15; mixed, $9.85 to $10; yorkers $9.75 to $9.85; light do., $9.50 to $9.75; pigs, $9.50 to $9.75; pigs, $9.50; roughs, $7.75; stags, $5 to $5.50.

Sheep and lambs, 1,400; steady and unchanged.

ESCAPED LARGE PAYMENTS.

Western Provinces Are Relieved of G. T. P. Charges.

OTTAWA, Oct. 16.—The announcement that, beginning November 1st, the interest payments on the bonds of the branch lines of the Grand Trunk Pacific, guaranteed by the Provinces of Alberta and Saskatchewan, will be met through the Canadian National Railways, means that the Dominion Government has relieved those provinces of contingent liability for $16,775,931 of bond guarantees on which the annual interest charge is a little over $680,000.

The bonds guaranteed by Saskatchewan are $11,310,026 of four per cent. first mortgage Saskatchewan lines sterling bonds and $1,991,792 in 4½ terminal sterling bonds. Those guaranteed by Alberta are $1,154,113 four per cent. first mortgage Alberta lines sterling bonds and $2,430,000 four per cent. first mortgage Alberta sterling bonds. In the halcyon days before the war these guarantees were lightly given by the prairie Governments, who professed to believe that they would never cost the provinces a dollar.

Before the Grand Trunk Pacific went into the receiver's hands, the management paid the interest on these bonds out of revenue, which meant that a portion of the moneys advanced by the Dominion Government was being used for this purpose. Against which practice the latter made protest. After the receiver took hold, no further payments were made by the company, and so the provinces, as guarantors, had to come through. This they have done, and have subsequently been reimbursed by the Dominion.

Masterpieces Cross Atlantic.

LONDON, Oct. 16.—Franz Hals' portrait "Francois Wouters" and Romney's "Nathaniel Dance" are the two latest masterpieces which will be sent from England to America, according to the Weekly Despatch.

The paper points out that the sale has been made despite the recent campaign to prevent such works of art from crossing the Atlantic.

Holsteins to the Fore.

ST. PAUL, Minn., Oct. 16.—Ontario won several championships in Saturday's judging. McGhee Bros., of Beachville, won senior and grand championship, female, on the four-year-old cow Aggie Sylvia Haley, and Lee, Springford, won the junior championship on bulls on Cir Romeo Mildred Colantha. In produce of cow, James Rettie, Norwich, won third, and in get of sire McGhee Bros. were also third. Haley and Lee won fifth, and James Rettie ninth in female calves. In a class of 48 F. E. Hilliker, Burgessville, won second and M. L. Haley fifth, in females over one year and under 18 months. In a class of 27 in heifers under two years McGhee Bros. won ninth in a class of 35. In the state herd competition, which consists of ten animals, owned by at least five different owners, the awards were as follows: First, Minnesota; second, Ontario; third, Wisconsin; fourth, Iowa; fifth, Illinois.

The National Dairy Show, which closed Saturday night has been one of the greatest and most successful shows ever held.

Blow to Dream.

AMOY, China, Oct. 16. — Pekin's Central Republican Government, which has been trying to unite all of China under its control, has another menacing foe in the form of Gen. Hsu Chu-Chen, known as "little Hsu," who Saturday installed himself as leader of an independent government in Foochow, capital of Fukien province.

It was reported officially that Foochow was captured by the army of Gen. Hsu Tsung-Chi, an ally of "little Hsu," the evening of October 12. There was little fighting. Foreigners are safe.

Li Hau-Chi, military governor of Fukien, escaped to Formosa on a Japanese ship.

Illuminated Police for Night Traffic.

THE HAGUE, Oct. 16.—The illuminated traffic policemen are the latest in The Hague. At night each traffic cop attaches a small pocket battery to his belt, connects it with a light up his sleeve, and is ready for business.

When he raises his hand and presses the second and third fingers together, contact is made and the light throws a glare on his white glove. The chief of police declares this device saves expensive searchlights, hitherto used at street corners.

The STRANGE CASE of CAVENDISH

By RANDALL PARRISH

AUTHOR OF "THE DEVIL'S OWN" "THE LADY OF THE NORTH" ETC.

COPYRIGHT, BY RANDALL PARRISH

"What happened there is probably this: Young Cavendish was informed of the existence of the will, and it was offered to him at a price which he couldn't refuse to pay—just then.

"Perhaps he was frightened into signing a promise to pay as soon as he came into the estate—tricked by Enright. John Cavendish may be innocent, or he may be guilty, but one thing is certain—he's being badgered to death by two people, from what little we know. One of them is the La Rue woman; the other is Enright."

Farriss sat reflecting deeply, chewing the stem of his dead pipe.

"There's one thing that conflicts with your hypothesis, Valois' statement that he was almost positive that the dead man was not Cavendish."

"I now believe Valois is mistaken, in view of developments," said Willis with finality. "So does Stella—Miss Donovan, I mean. Remember the body was charred across the face and chest—and Valois was excited."

Farriss was silent a moment.

"Stick to it a while longer," he repeated out; "and get La Rue and Cavendish together at their meeting-place, if you can discover it."

"We can!" interjected Willis. "It's Steinway's cafe, the place where the police picked up Frisco Danny and

"La Rue!" Whispered Willis to Miss Donovan.

Mad Mike Meighan two years ago. I followed them, but could not get near enough to hear what they said."

"Then hop to it," Farriss rejoined. "Slick around there until you get something deeper. As for me—I'm going home. It's two o'clock."

* * * * * * *

It was the second night after Farriss had given them his instructions that Miss Donovan and Willis, sitting in the last darkened booth in Steinway's cafe, were rewarded for their vigil. As they sat toying with their food, their eyes commanding the entire room, they saw a woman swing into the cafe entrance and enter the booth directly ahead of them.

"La Rue!" whispered Willis to Miss Donovan.

Ten minutes later a young man entered the cafe, swept it quickly with his eyes, then made directly for the enclosure occupied by his inamorata. The man was Cavendish.

In the booth behind, Miss Donovan and Willis were all attention, their ears strained to catch the wings of conversation that eddied over the low partition.

"Well, I'm here." It was John's voice, an ill-humored voice, too. "But this is the last time, Celeste. These meetings are dangerous."

"Yes—when you talk so loud." Her soft voice scarcely reached the listeners. "But this time there was a good reason." She laughed. "You didn't think it was love, did you, deary?"

"Oh, cut that out!" disgustedly. "You want more money, I suppose."

"Well, of course," her voice hardening. "Naturally I feel that I should share in your good fortune. But the amount I want now, and must have to-night—to-night, John Cavendish—is not altogether for myself. I've heard from the West."

"My God! Has he been located?"

"Yes, and is safe for the present. Here, read his telegram. It's not very clear, but Beaton wants money and asks me to bring it."

"You? Why does he need you?"

"Lack of nerve, I guess; he's out of his element in that country. If it was the Bowery he'd do the sort of job better. Anyhow, I'm going, and I want a roll. We can't either of us afford to lie down now."

Cavendish half smothered an oath. "How much do you want?"

"Ten thousand. I'm willing enough to split fifty-fifty. This Colorado job is getting to be expensive, deary. I wouldn't dare draw on you through the banks."

In the back booth Willis muttered: "Glad things are going great." Then he bent his ear to sedulous attention and again he could hear the voice of Cavendish.

"You've got to tell me what you're going to do with the money," it said. The La Rue woman's answer could not be heard; evidently it was a whispered one, and therefore of utmost importance. Came a pause, a clink of glasses, and then a few straggling words filtered over the partition.

"But if the man should talk!"

"Forget it! Ned Beaton is an oyster. Besides, I've got the screws on him. Come on, Johnnie boy, don't be a fool. We are in this game and must play it out. It has been safe enough so far, and I know what I am doing now. You've got too much at stake to haggle over a few thousand, when the money has come to you as easily as this has. Do I get the money?"

He must have acceded, for his voice no longer rose to a high pitch. Presently, when the orchestra began playing again, Miss Donovan and Willis judged the pair were giving their attention to the dinner. Finally, after an hour had passed, Cavendish emerged from the booth, went to the check-room, and hurriedly left the cafe. Waiting only long enough to satisfy herself that Cavendish was gone, Celeste La Rue herself emerged from the booth and paused for a moment beside its bamboo curtains. Then turning suddenly, she made her way, not toward the exit of the cafe, but to another small booth near the check-room, and into this she disappeared.

But before she had started this short journey, a yellow piece of paper, closely folded, slipped from her belt where it had been tucked.

"It's the telegram! The one of which they were speaking," Miss Donovan's voice whispered dramatically as her eyes swept the tiny clue within their ambit.

At her words Willis was out of the booth. As Miss Donovan watched, she saw him pass by the folded evidence. What was wrong? But, no—suddenly she saw his handkerchief drop, saw him an instant later turn and pick it up, and with it the telegram. Disappearing in the direction of the men's room, he returned a moment later, paid the check, and with Miss Donovan on his arm left the cafe.

Outside, and three blocks away from Steinway's, they paused under an arc light, and with shaking hands Willis showed her the message. There, in the flickering rays, she got read its torn and yet enlightening message:

"Iorado, May 19, 1915.

"him safe. Report and collect. come with roll Monday sure 've seen papers. Remember Haskell. "NED."

"It's terribly cryptic, Jerry," she said to the other, "but two things we know from it."

"One is that La Rue's going to blow the burg some day—soon."

"The other, that 'Ned,' is Ned Beaton, the man mentioned back there in Steinway's. Whatever his connection is, we don't know. I think we had better go to Farriss, don't you?"

"A good bunch," Willis replied, taking her arm.

In their enthusiasm they upset the custom of the office and broke into Farriss' felled home. Into his impatient ears they dinned the story of what they had just learned, ending up by passing him the telegram.

For a mere instant he glanced at them, then his lips began to move. "Benton — Ned — Ned Benton — Ned Beaton," he mused, and then sat bolt upright in his chair, while he banged the desk with a round, hard fist.

"You've run across something. I know that name. I know the man. Ned Beaton is a 'gun,' and he pulled his first job when I was doing police in Philadelphia for the Record. Well, well, my children, this is splendid! And what next?"

"But, Mr. Farriss, where is he?" put in Stella Donovan. "Where was the message sent from? Colorado, yes, but where in Colorado? That's the thing to find out."

"I thought it might be the last word in the message—Haskell," ventured Willis.

Farriss, seizing an atlas, thumbed it until he found a map of Colorado. Together the three pored over it.

"There it is!" Stella Donovan cried suddenly. "Down toward the bottom. Looks like desert country."

"Pretty dry place for Celeste," laughed Willis. "I might call her up and kid her about it if—"

Farriss looked at him sourly. "You might get a raise in salary," he snapped sharply. "If you'd keep your mind on the job. What you can do is call up, say you're the detective bureau, and ask carelessly about Beaton. That'll throw a scare into her. You've got her number?"

"Riverside 7683," Willis said in a businesslike voice.

He disappeared into the clattering local room, to return a moment later white of face, bright of eye, and with lips parted.

"What's the dope?" Farriss shot at him.

"Nothing!" cried the excited young man. "Nothing except that fifteen minutes ago Celeste La Rue kissed the Beecher apartments good-by and, with trunk, puff and toothbrush, beat it."

"To Haskell," added the city editor, "or my hair is pink. And by heaven, I believe there's a story there. What's more, I believe we can get it. It's blind chance, but we'll take it."

"Let Mr. Willis—" began Miss Donovan.

"Mind your own business, Stella," commanded Farriss, "and see that your hat's on straight. Because within half an hour you're going to draw on the night cashier for five hundred dollars and pack your little portmanteau for Haskell. Work guardedly; query us when you have to; be sure of your facts, and consign your soul to God. Do I see you moving?"

And when Farriss looked again he did.

CHAPTER IV.

Miss Donovan Arrives.

When the long overland train paused a moment before the attendant box car that served as the depot for the town of Haskell, nestled in the gulch half a mile away, it deposited Miss Donovan almost in the arms of Carson, the station agent, and he, wary of the wiles of women and the ethics of society, promptly turned her over to Jim Westcott, who had come down to inquire if the station agent held a telegram for him—a telegram that he expected from the East.

"She oughtn't to hike to the Timmons house alone, Jim," Carson said. "This yere is pay day up at the big mines, an' the boys are havin' a h—of a time."

In view of this disclosure, Miss Donovan welcomed the courteous acquiescence of Westcott, whom she judged to be a man of thirty-one, with force and character—these written in the lines of his big body and his square, kind face.

"I'm Miss Stella Donovan of New York," she said directly.

"And I," he returned, with hat off in the deepening gloom, "am Jim Westcott, who flings away at a mining claim over yonder."

"There!" laughed the girl frankly. "We're introduced. And I suppose we can start for the Timmons house."

As her words trailed off there came the sound of yelling, sharp cries, and revolver shots from the gulch below where lights twinkled faintly.

Laughing softly, Westcott picked up her valise, threw a "Come" to

"The Drunken Fool," He Muttered Quietly.

Carson, and with Miss Donovan close behind him, began making for the distant lights of the Timmons house. As they followed the road, which paralleled a whispering stream, the girl began to draw him out skilfully, and was amazed to find that for all of his rough appearance he was excellently educated and a gentleman of taste. Finally the reason came out.

"I'm a college man," he explained proudly. "So was my partner—same class. But one can't always remain in the admirable East, and three years ago he and I came here prospecting. Actually struck some pay-dirt in the hills yonder, too, but it sort of petered out on us. It was broken in two by some upheaval of nature. We were still trying to find it when my partner's father died and he went East to claim the fortune that was left. I struck the vein again—when my last dollar was gone. That was a month ago. I wired my old partner for help, but—" He stopped, listening intently.

They were nearing a small bridge over Bear creek, the sounds of Haskell's revelers growing nearer and louder. Suddenly they heard an oath and a shot, and the next moment a wild rider, lashing a foaming horse with a stinging quirt, was upon them. Westcott barely had time to swing the girl to safety as the tornado flew past.

"The drunken fool!" he muttered quietly. "A puncher riding for camp. There will be more up ahead probably."

His little act of heroism drew the man strangely near to Miss Donovan, and as they trudged along in the silent night she felt that above all he was dependable, as if, too, she had known him months, aye years, instead of a scant hour. And in this strange country she needed a friend.

"Now that I've laid bare my past," he was saying, "don't you think you might tell me why you are here?"

The girl stiffened. To say that she was from the New York Star would close many avenues of information to her. No, the thing to do was to adopt some "stall" that would enable her to idle about as much as she chose. Then the mad horseman gave her the idea.

"Oh!" she exclaimed, "I forgot I hadn't mentioned it. I'm assigned by Scribbler's Magazine to do an article on 'The Old West. Is It Really Gone?' and, Mr. Westcott, I think I have a lovely start."

A few moments later she thanked Providence for her precaution, for her companion resumed the story of his mining claim.

"It's might funny I haven't heard from that partner. It isn't like him not to answer my wire. That's why I've waited every night at the depot. No, it's not like 'Pep,' even if he does take his leisure at the College club."

Miss Donovan's spine tingled at the mention of the name. "Pep," she murmured, trying to be calm. "What was his other name?"

"Cavendish," Westcott replied.

COULD HARDLY MOVE IN HER BED

Eight Bones "FRUIT-A-TIVES" Completely Relieved Her.

MADAM RICHER

Labelle, P.Q., April 18th, 1921

"It is my duty to tell you and publish to all what your remedy 'Fruit-a-tives' has done for me.

I suffered with Rheumatism for ten months; could hardly move in bed, and was miserable all the time. I tried several physicians and took many remedies, but they left me at the same place, in bed and suffering, the Rheumatism was so bad.

I finally started in taking "Fruit-a-tives" and continued the treatment regularly as I found myself getting better. After using eight boxes of "Fruit-a-tives" (which cost only $4.) I am completely well without a trace of Rheumatism."

MADAM J. RICHER.

50c a box, 6 for $2.50, trial size 25c. At all dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

"Frederick Cavendish.'

A gasp almost escaped the girl's lips. Here, within an hour, she had linked the many eastern clues of the Cavendish affair with one in the West. Was ever a girl so lucky? And immediately her brain began to work furiously as she walked along.

A sudden turn about the base of a large cliff brought them to Haskell, a single street running up the broadening valley, lined mostly with shacks, although a few more pretentious buildings were scattered here and there, while an occasional tent flapped its discolored canvas in the night wind.

They went forward, Westcott watchful and silent, the valise in one hand, the other grasping her arm. The narrow stretch of sidewalk was jammed with men, surging in and out through the open door of a saloon, and the two held to the middle of the road, which was lined with horses tied to long poles. Men reeled out into the street, and occasionally the sharp crack of some frolicsome revolver punctuated the hoarse shouts and bursts of drunken laughter. No other woman was visible, yet, apparently, no particular attention was paid to their progress. But the stream of men thickened perceptibly, until Westcott was obliged to shoulder them aside good-humoredly in order to open a passage. He released her arm and suddenly gripped the shoulder of a man passing. He was the town marshal.

"Say, Dan, I reckon this is your busiest night, but I wish you'd help me run this lady through as far as Timmons; this bunch of longhorns appear to be milling, and we're plum stalled."

The man turned and stared at them. Short, stockily built, appearing at first view almost grotesque, under the broad brim of his hat. Stella, recognizing the marshal, was conscious only of a clean-shaven face, a square jaw and a pair of stern blue eyes.

"Oh, is that you, Jim?" he asked briefly. "Lord, I don't see why a big boob like you should need a guardian. The lady? Pardon me, madam," and he touched his hat. "Stand back there, you fellows. Come on, folks."

The little marshal knew his business, and it was also evident that the crowd knew the little marshal. Drunk and quarrelsome as many of them were, they made way—the more obstreperous sullenly, but the majority in a spirit of rough good humor. The three passed straight through the surging mass in the man-crowded lobby of the disreputable hotel.

At the desk, wide-eyed with excitement, Miss Donovan took a second look at the clerk stepping slightly forward, and knocking the ashes out of his pipe. Beaton laughed, assuming a semblance of good nature.

"My questions were prompted solely by curiosity," he explained, evidently not wholly at ease. "I'm expecting a young woman, and thought this new arrival might prove to be my friend."

"Hardly," returned Westcott dryly. "As the landlord informed you, Miss Donovan is a lady."

If he expected this shot to take effect he was disappointed, for the grin never left Beaton's face.

"Ah, a good joke; a very good joke, indeed. But you misunderstand; this is altogether a business matter. This young woman whom I expect is coming here on a mining deal—it is not a love affair at all, I assure you."

"I thought possibly you might care to question me regarding my acquaintance with the young woman?" Westcott went on, his voice hardening slightly. "If so, I have not the slightest objection to telling you that it consists entirely of acting as her escort from the station to the hotel. I do not know why she is here, how long she intends staying, or what her purpose may be. Indeed, there is only one fact I do know which may be of interest to you."

Beaton, surprised by the language of the other, remained silent, his face turning purple, as a suspicion came to him that he was being made a fool of.

"It is this, my friend—who she is, what she is, and why she happens to be here, is none of your damn business, and if you so much as mention her name again in my presence you are going to regret it to your dying day. That's all."

Beaton, glancing about at the uplifted faces of the card players, chose to assume an air of indifference, which scarcely accorded with the anger in his eyes.

"Ah, come now," he blurted forth, "I didn't mean anything; there's no harm done—let's have a drink, and be friends."

Westcott shook his head.

"No, I think not," he said slowly. "I'm not much of a drinking man myself, and when I do I choose my own company. But let me tell you something Beaton, for your own good. I know your style, and you are mighty apt to get into trouble out here if you play my Bowery tactics."

"Bowery tactics!"

"Yes; you claim to live in New York, and you possess all the earmarks of the East side bad man. There is nothing keeping you now from roughing it with me but the sight of this gun in my belt, and a suspicion in your mind that I may know how to use it. That suspicion is correct. Now you go back to your barroom, where you will find plenty of your own kind to associate with. It's going to be dangerous for you to hang around here any longer."

Beaton felt the steady eyes upon him, but was carrying enough liquor to make him reckless. He stepped backward, feigning a laugh, watchful to catch Westcott off his guard.

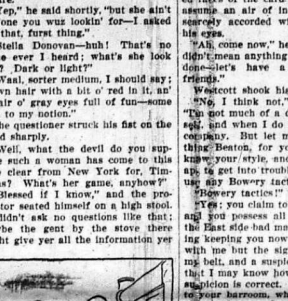

"All right, then," he said, "I'll go get the drink; you can't bluff me."

Westcott's knowledge of the class alone brought to him the man's purpose. Beaton's hand was in the pocket of his coat, and, as he turned, apparently to leave the room, the cloth bulged. With one leap forward the man was at his throat. There was a report, a flash of flame, the speeding bullet striking the stove, and the next instant Beaton, his hand still helpless, imprisoned within the coat pocket, was hurled back across a card table, the players scattering to get out of the way. All the pent-up dislike in Westcott's heart found expression in action; the despicable trick wrought him to a sudden fury, yet even then there came to him no thought of killing the fellow, no memory even of the loaded gun at his hip. He wanted to choke him, strike him with his hands.

"You dirty coward," he muttered fiercely. "So you thought the pocket trick was a new one out here, did you? Come, give the gun up! Oh! so there is some fight left in you? Then let's settle it here."

It was a struggle between two big, strong men—the one desperate, unscrupulous, brutal; the other angry enough, but retaining self-control! They crashed onto the floor, Westcott still retaining the advantage of position, and twice he struck, driving his clenched fist home. Suddenly he became aware that some one had jerked his revolver from its holster and, almost at the same instant a hard hand gripped the neck-band of his shirt and tore him loose from Beaton.

"Here now—enough of that, Jim," said a voice sternly, and his hands arose instinctively as he recognized the gleam of two drawn weapons fronting him. "Help Beaton up, Joe. Now, look yere, Mr. Bully Westcott," and the speaker shook his gun threateningly. "As it happens, you have

"Miss Donovan Is a Lady."

want. He brought her up from the depot, an' kin talk English. Say, Jim, this yere is a shorthorn from New York, named Benton, an' he seems ter be powerfully interested in skirts—Beaton, Mr. Jim Westcott."

The two men looked at each other, the latter stepping slightly forward, and knocking the ashes out of his pipe. Beaton laughed, assuming a semblance of good nature.

"My questions were prompted solely by curiosity," he explained, evidently not wholly at ease. "I'm expecting a young woman, and thought this new arrival might prove to be my friend."

"Hardly," returned Westcott dryly. "As the landlord informed you, Miss Donovan is a lady."

If he expected this shot to take effect he was disappointed, for the grin never left Beaton's face.

"Ah, a good joke; a very good joke, indeed. But you misunderstand; this is altogether a business matter. This young woman whom I expect is coming here on a mining deal—it is not a love affair at all, I assure you."

"I thought possibly you might care to question me regarding my acquaintance with the young woman?" Westcott went on, his voice hardening slightly. "If so, I have not the slightest objection to telling you that it consists entirely of acting as her escort from the station to the hotel. I do not know why she is here, how long she intends staying, or what her purpose may be. Indeed, there is only one fact I do know which may be of interest to you."

Beaton, surprised by the language of the other, remained silent, his face turning purple, as a suspicion came to him that he was being made a fool of.

"It is this, my friend—who she is, what she is, and why she happens to be here, is none of your damn business, and if you so much as mention her name again in my presence you are going to regret it to your dying day. That's all."

Beaton, glancing about at the uplifted faces of the card players, chose to assume an air of indifference, which scarcely accorded with the anger in his eyes.

"Ah, come now," he blurted forth, "I didn't mean anything; there's no harm done—let's have a drink, and be friends."

Westcott shook his head.

"No, I think not," he said slowly. "I'm not much of a drinking man myself, and when I do I choose my own company. But let me tell you something Beaton, for your own good. I know your style, and you are mighty apt to get into trouble out here if you play my Bowery tactics."

"Bowery tactics!"

"Yes; you claim to live in New York, and you possess all the earmarks of the East side bad man. There is nothing keeping you now from roughing it with me but the sight of this gun in my belt, and a suspicion in your mind that I may know how to use it. That suspicion is correct. Now you go back to your barroom, where you will find plenty of your own kind to associate with. It's going to be dangerous for you to hang around here any longer."

Beaton felt the steady eyes upon him, but was carrying enough liquor to make him reckless. He stepped backward, feigning a laugh, watchful to catch Westcott off his guard.

"All right, then," he said, "I'll go get the drink; you can't bluff me."

Westcott's knowledge of the class alone brought to him the man's purpose. Beaton's hand was in the pocket of his coat, and, as he turned, apparently to leave the room, the cloth bulged. With one leap forward the man was at his throat. There was a report, a flash of flame, the speeding bullet striking the stove, and the next instant Beaton, his hand still helpless, imprisoned within the coat pocket, was hurled back across a card table, the players scattering to get out of the way. All the pent-up dislike in Westcott's heart found expression in action; the despicable trick wrought him to a sudden fury, yet even then there came to him no thought of killing the fellow, no memory even of the loaded gun at his hip. He wanted to choke him, strike him with his hands.

"You dirty coward," he muttered fiercely. "So you thought the pocket trick was a new one out here, did you? Come, give the gun up! Oh! so there is some fight left in you? Then let's settle it here."

It was a struggle between two big, strong men—the one desperate, unscrupulous, brutal; the other angry enough, but retaining self-control! They crashed onto the floor, Westcott still retaining the advantage of position, and twice he struck, driving his clenched fist home. Suddenly he became aware that some one had jerked his revolver from its holster and, almost at the same instant a hard hand gripped the neck-band of his shirt and tore him loose from Beaton.

"Here now—enough of that, Jim," said a voice sternly, and his hands arose instinctively as he recognized the gleam of two drawn weapons fronting him. "Help Beaton up, Joe. Now, look yere, Mr. Bully Westcott," and the speaker shook his gun threateningly. "As it happens, you have jumped on a friend o' ours, an' we naturally propose to take a hand in this game—you know me!"

Westcott nodded, an unpleasant smile on his lips.

"I do, Lacy," he said coolly, "and that if there is any dirty work going on in this camp it is quite probable you and your gang are in it. Now listen; you've got me covered, and that is my gun which Moore has in his hand. I cannot fight you alone and unarmed; but I can talk yet."

"I reckon yer can, if that's goin' ter do yer eny good."

"So the La Rosita Mining company is about to be revived, is it? Eastern capital becoming interested. I've heard rumors of that for a week past. What's the idea? Struck anything?"

Lacy, a long, rangy fellow, with a heavy mustache, and a scar over one eye partially concealed by his hat-brim, grinned at the others as though at a good joke.

"No, nuthin' particular as yet," he answered; "but you hev', an' I reckon that's just about as good. Tryin' ter keep it dark, wasn't yer? Never even thought we'd caught on."

"Oh, yes, I did; you flatter yourselves. I caught one of your stool-pigeons up the gulch yesterday, and more than ten days ago Moore and Edson made a trip into my tunnel while I happened to be away; they forgot to hide their trail. I knew what you were up to, and you can all of you look for a fight."

"When your partner gets out here, I suppose," sneered Lacy.

"He'll be here."

"Oh, will he? Well, he's a h—— of a while coming. You wired him a month ago, and yer've written him twice since. Oh, I've got the cases on you all right, Westcott. I know you haven't got a cent left to go on with, an' nowhere to get any except through him." He laughed. "Ain't that right? Well, then, yer chances look mighty slim ter me just at present, ol'-timer. However, there's no fight on yet; will yer behave yerself, an' will Beaton go alone if I hand yer back yer gun?"

"There is no choice left me."

"Sure; that's sensible enough; give it to him, Moore."

He broke the chamber, shaking the cartridges out into his palm; then handed the emptied weapon over to Westcott. His manner was purposely insulting, but the latter stood with lips firmly set, realizing his position.

(To be continued.)

The Sheldrake.

The sheldrake, unlike ducks in general, can walk on land with some amount of dignity, there being an entire absence of anything like a waddle. But this is not its only claim to distinction, for in nesting matters it shows marked individuality. Its favorite breeding place is in some sandy spot near the water, but always on the seashore, and it has an especial liking for rabbit burrows, from which it evicts the rightful owners with no more ado than a "By your leave." Once the owner is out, he is never permitted to return, while Mr. and Mrs. Sheldrake, unlike most others of the duck tribe, take a great interest in the arrangement of the nest, and bears considerable share in looking after the little brood when it arrives.

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

SHORT TERM CREDITS

How the Government Co-operates With Local Associations.

Individual Farmers, the Township Council and the Government Pool Subscriptions — Managed by a Local Board — Ten Associations Already Doing Business.

(Contributed by Ontario Department of Agriculture, Toronto.)

There is one distinctive difference between the system of long-term loans and the system of short-term loans recently inaugurated in this Province. Those who have followed the preceding articles will have observed that long-term loans are made direct by the Agricultural Development Board, 5 Queen's Park, Toronto. In contrast to this, no short-term loans are made by the Board, but are made solely through local associations organized for this purpose.

Short Time Credits Described.

The reason for this difference in method of operation lies in the difference in the nature of the security and the nature of the loan. In the matter of long-term loans, the security is a first mortgage on land, and the personality of the borrower, while important, is secondary. In the short-term loans, the security is largely or that on chattels, and the personality of the borrower, and his reputation in the community, is one of the big determining factors. Then, too, the loan is usually a small one. Under $2,000 is the maximum, the average loan will no doubt be a good deal under $1,000. It would, therefore, be practically impossible for any Board to grant and supervise loans in all the different sections of the Province for small amounts. No other system of granting short-term loans on personal or chattel security than a central office for a whole Province is in existence. Such loans may, however, be granted with reasonable safety by local committees familiar with all the circumstances.

Not So Difficult.

Accordingly, a plan of organization of local farm loan associations has been devised, and this is not so difficult as might at first appear. A membership of thirty is required, and each member must take one share of stock, value $100, and make a payment of 10 per cent., or $10. This stock represents capital, and is held in reserve. There is little likelihood of any further payment ever being required on capital account. After the necessary membership is signed up, the township council and the Government are each asked to appoint two directors, and subscribe for one-half the amount of stock subscribed by local members; this to be added to the reserve. When these directors have been appointed, the association elects a president, vice-president and one director. These officers, with the two Government directors and the two township directors, constitute a board of seven, which, thereafter, looks after the business of the association. A secretary-treasurer is appointed, and he is the only paid officer permitted. When the association is thus formed it continues from year to year with the usual annual election of officers, and applications for loans can then be made from time to time to the secretary-treasurer, who will arrange to have them considered by the directors.

In practice, it will probably be found desirable to have meetings stated periods for the consideration of the loans. In this way, loans may be passed without any inconvenience either to the borrower or to the directors.

Associations Already Formed.

Although this plan has been before the farmers of the Province for only a few month, ten associations have been formed, and are doing business, while two others have been formed, but have not yet passed on loans. Loans granted range from $125 to $1,800, in individual cases, and are for all manner of purposes in connection with farm work. They are repayable at the end of the year with interest at 6½ per cent., but, of course, may be renewed for another year if the directors feel that such renewal is justified.

Each applicant submits to the association a detailed statement of his assets and liabilities, and also signs a promissory note. The application is then endorsed by the president and secretary of the association and sent in to the Board for approval and for issuing of cheque to cover the total amount loaned to an association. While, therefore, the subject is approached from the standpoint of helping the man on the land in carrying out his farming operations, it will be seen that due regard is paid to the question of security, and if reasonable discretion is exercised there is no reason why any of the money so loaned should go astray.

Well Distributed.

The number of associations now doing business is regarded as a very satisfactory start. With the new system it was not expected that such associations would spring up in a night all over the Province, nor was it regarded as desirable that such should occur. The associations now in existence are well scattered over the province. The Board of Directors selected includes some of the very best farmers in the country. Their interest in the matter and their public-spirited efforts to assist their neighbors in the matter of finance gives the associations organized a good standing in their respective communities.

The future of this plan is now in the hands of the farmers themselves. It was placed on the Statute Book as an alternative system of merit in itself, and of value as an alternative where other agencies were found inadequate.

Timber In Labrador.

The forest of Labrador, though not known to be of great value and in immense extent, are hardly touched by man's enterprise. Black and white pines attain commercial size in most of the river valleys as far north as 55 degrees. Spruce two feet across and several feet long are numerous in the Hamilton River Valley. An adventurous aeronautical survey of the timber lands of the southeastern section made in 1919 showed a very general and dense distribution of good-looking timbers, birch and balsam poplars being everywhere in evidence among the conifers. Judging by the excellent spars up to seventy feet long which floated out of rivers as far north even as the big river of Adlavik north of Cape Harrison, the day is not far off when the lands of Cabin the "we" will ring to the tune of axes and saws" that will hew out prosperity for a people, even as at Chicoutimi and Abatibi, further west and south in the same peninsula.

PLUMBING ON THE FARM

Running Water Not a Luxury, But a Necessity.

Practical Hints on Home Installation —The Water Service Pipes—The Fixtures—Have a Good System of Drainage for Waste Water.

(Contributed by Ontario Department of Agriculture, Toronto.)

A plumbing system consists of three main parts: Water service, fixtures, and waste pipes.

The Water Service Pipes.

The duty of these pipes is to convey the water from the supply to the fixtures. They should be galvanized iron of first-class quality, and the size for the house is ¾-inch, except the one that connects the hot water boiler to the kitchen range or furnace, which is ¾-inch in size. Pipe is bought by the foot in small quantities and by the 100 feet in large quantities, and the price for galvanized iron pipe at the present time is 10 cents per foot for the ½-inch, and 12 cents for the ¾-inch. The amount required for a house is about 120 feet, but it varies with the size of the house and the layout, particularly the location of the bathroom in-relation to the kitchen, also whether soft water is on tap as well as hard water. Sections of pipe are joined together by threaded couplings, and red lead or a special paste is used on the threaded parts to make the joints tight and preserve the threads from rusting and becoming permanently set. The water in these pipes is usually under 30 to 50 pounds pressure, and all joints must be positively water-tight, particularly so if the pipes are laid under floors.

Test the Pipes for Leaks.

After they are installed and before they are covered up either under floors or in partitions, and before they are covered up for good, the water should be turned on under good pressure and a thorough test made for leaks, not only at the joints but all along the pipe line, as a small hole or split would cause a serious leak.

Be sure the man operating the threading tool knows his job and does it properly. It is very essential that the water pipes be located safe from frost, and therefore it is highly advisable to keep them away from the outside wall of the house or stable, if possible.

It is particularly imperative to keep the pipes connecting the hot water boiler to the kitchen range or furnace fire box from freezing, as a stoppage in this line would cause a blow-out upon the fire being started in the morning, and serious loss of life or property would likely occur, and lastly it is very poor economy to install anything less than the highest quality of galvanized pipe, never use wrought iron pipe for water, galvanized always.

Plumbing Fixtures.

These comprise the kitchen sink, laundry tubs, bathtub, lavatory sink, and closet. There is a considerable variety in the style and quality of these articles, and naturally a large range in prices. You should insist on a good quality of enamel coating on the fixtures, this is very important. The standard dimension of some of these fixtures are as follows:—Kitchen sink, 20 x 30 inches. This sink should have a back, and one drain board, at least, of wood or enamelled iron should be provided for, two are better. The sink should be located at the most convenient height above the floor for the women using it; not too low, also undue stooping has to be endured. A 5-foot bathtub is the standard size. It should be placed far enough from the wall to make easy cleaning around it possible. The lavatory sink may be secured in a shape either for side wall or corner installation. In the installation of a closet insist on a stop-cock on the feed pipe to the tank, so that if the tank needs repairing the water can be turned off just below the tank. Any standard type is satisfactory.

The cost of a standard outfit is about as follows: Lavatory sink, complete with trimmings, $24.50. Closet complete, $35.00. Kitchen sink, 20 x 30 inches, with bibbs and trap, $23.35. Laundry tubs, $25.00. Bathtub, 4½ or 5 feet, $66.50, or total of $204.85. The cost of the soil pipe, water pipe and connections including labor for installing them and the fixtures is about $195, making a total of about $400.00.

A Drainage System.

This part of the plumbing system consists of the soil pipe or stack that extends from the sewer up through the house and out beyond the roof. All the wastes drain into this pipe and by it are carried to the sewage disposal system. Each fixture is connected to this main drain by a smaller pipe having a trap to keep bad odors from coming back from the sewer. The stack is 4-inch cast-iron pipe made in 5-foot sections, and the joints are caulked with oakum and lead. The other pipes are 2 inch and 1½ inch, either iron or lead. Installing this part of this work, also the water service pipes, is commonly known as "roughing in." Space will not permit of further treatment of the subject.

Write the Department of Physics, O. A. C., Guelph, for advice, and for a copy of Bulletin 267, "Farm Water Supply and Sewage Disposal."—R. H. Graham, O. A. College, Guelph.

Few gardeners realize the importance of pulverizing the soil as deeply as it is ploughed. No matter how perfectly the surface is prepared, if the soil is coarse and lumpy below, the plants will not thrive. Large air spaces in the soil are a detriment, but a large number of very small air spaces in the soil are a benefit.

TREES OF NATIVE NUTS.

They May Make Income for Lucky Owner.

Native nut trees, such as the black walnut and members of the hickory group including the pecan, have a potential value not generally realized. Aside from the well-known value of the timber of the walnut in the making of furniture, gun-stocks, and airplane propellers, and of the white hickories in the manufacture of automobile wheels, tool handles, and many other articles, and even of pecan wood in its variety of uses, particularly for harness hames, these trees, when rightly selected and placed, form most attractive ornamentals. But, in addition to these uses, which alone are of enough importance to justify the careful preservation of existing trees and the planting of others, they have an economic value in the nuts produced.

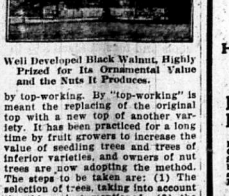

These native nuts, even though uncultivated and unimproved, and, perhaps, inferior in shell thickness and cracking quality, are preferred by many to any of the cultivated kinds from Europe and Asia.

On many farms by-products or small crops make important additions to the income, and in many localities nut trees planted about the farm buildings, along the highways, or in other unoccupied spaces or old trees that have been left in the clearing away of the original forest, are depended upon to add noticeably to the bank account. Forward-looking farmers want to make their trees produce the best nuts and in the greatest possible quantity.

First of all, every tree intended to bear nuts in quantity needs ample space, 60 feet being none too great an interval between trees of equal rate of growth, and larger trees, unless on the shady side, should be 100 feet apart. A fertile soil that is reasonably moist is best for nut trees, well-drained clay loam being the most desirable.

Variety is next in importance to soil and location. Experienced observers know that nut trees do not come true to seed, and that the only way to reproduce a variety or an idealized type is by grafting or budding, as is done with apples, peaches, pears and other fruits. Nurserymen in the northern part of the country are now propagating several varieties of black walnuts, pecans, hickories, and butternuts by these methods, but due to the fact that active interest began only a decade ago, none of these varieties has been given much opportunity to demonstrate its usefulness as a money-crop producer. However, several varieties are promising.

Mature native trees that are well shaped may be made more valuable

Well Developed Black Walnut, Highly Prized for Its Ornamental Value and the Nuts It Produces.

by top-working. By "top-working" is meant the replacing of the original top with a new top of another variety. It has been practiced for a long time by fruit growers to increase the value of seedling trees and trees of inferior varieties, and owners of nut trees are now adopting the method. The steps to be taken are: (1) The selection of trees, taking into account the things just mentioned; (3) the choice of varieties to be used, and the making sure of scions or bud sticks at the proper time; (3) the cutting back of the tops during the latter part of the dormant period or very early in the spring; (4) the actual process of grafting or budding; and (5) the subsequent care of the new growth.

In cutting back the tops preparatory to budding or grafting, certain rules should be rigidly followed: (1) No cut should be made where a limb is more than six inches in diameter, and a limit of three inches is preferred; (2) all cuts should be made so they will heal of themselves if, by chance, they receive no further attention; (3) cuts should be made in late winter while the trees are still dormant, or, at the latest, just before the leaves appear; (4) cuts should always be made slightly above a bud, which will assure renewal in case the graft should fail.

Grafting may be done by the common cleft method or the slip-bark method. The former is usually employed when the tree is still dormant and the latter at any time during the growing period, but the scions used must always be dormant, and as scions in that condition are seldom available after the first of April neither method is of much interest just now. It is now too late to top-work trees this season, but those that have been cut back and small trees that may be budded without cutting back may be left until late summer or autumn, so that scions (then called bud sticks) of the better varieties may be obtained and buds from them inserted in the bark of the new shoots.

Advantages of Cultivation.

Keep the hand cultivator going to preserve a dust mulch and to kill weeds. Either pull or hoe the weeds out of the vegetable rows. The best time to kill weeds is when they have just pushed through the top of the ground. Frequent shallow cultivation will do this as well as conserve moisture.

SURPRISE
A PURE HARD SOAP
SURPRISE SOAP

A Big Bar

A full-size, full-weight, solid bar of good soap is "SURPRISE." Best for any and all household use.

GOWNS FOR THE STOUT BRIDE

Care Should Be Taken to Avoid Boldly Overdressing; Long, Unbroken Lines Suitable.

There are stout brides to be dressed as well as slim ones and for them are suggested panels, long, unbroken lines or fine draperies that fall with a certain weight, but never should a plump figure call attention to itself by overdressing or by trying to follow some fashion, charming in itself, perhaps, but only adapted to the unusually tall and thin.

Sometimes, by boldly exaggerating curves, one can make them appear actually less as, for example, in the full petticoats of the time of Louis XVI, when a full hip was well disguised and a waist, however ample, appeared small in comparison.

This handsome new tall creation for street wear is made of navy poiret. The collar, cuffs and belt are trimmed with caracul fur, side panel and sash trimmed with cut steel cabochons.

BLACK CREPE FOR DRESSES

All-Around Satisfactory Color Holds Favor With Many Women for Luncheon Time.

Many of the dresses seen at luncheon time are made of black crepe, for there is a certain portion of the population which never seems to care to desert that all-around and satisfactory color. These frocks are invariably long, and almost always they have some sort of draping at one side of the skirt, which has a way of hanging much below the hem of the dress which, to begin with, is long enough to strike the ankles. Then this sort of frock you will find being worn with hats that are extremely large of brim, with little trimming, but with a great deal of line, which helps them to add materially to the grace of the costume as it originally existed.

Some frocks of foulard stand very high among those that are fashionable. They are especially those made of black and white or dark blue and white prints when they are made along formal lines. They, too, are draped, with the exception of a few little bits of lace used just as edging that are left to show their pattern quite uninterruptedly. One of these was of a black and white print, the design being of conventional roses in white that twined over the fabric in sprays. The skirt was so intricately draped that it was hard to tell exactly what the scheme of its design was founded upon, and the bodice, quite tightly fitted, had a square neck to carry out the lines upon which the frock was founded. With this was worn a white transparent straw hat trimmed with one large swooping bow of white moire ribbon across one side of the brim. A black chantilly lace veil drooped over the brim and to the shoulders, and the earrings were made of long strings of white pearls.

The linen street suits are only just beginning to appear. And this season they are done in the shape of the very simplest of little frocks. There are very few coats and skirts of that tailored type which linen used so often to be. But the linen dresses follow those bright colors that the tweeds established, and then they are kept to the coat-dress type, with large sleeves and big pearl buttons, and shawl or surplice collars to add distinction to their cut and make.

LATEST SWEATERS ARE SHEER

Slipover Type Takes Hold on Present-Day Demands; Vie With Mohair and Silk.

Very sheer sweaters of the slipover type have taken a strong hold on present-day demands, and vie in favor with mohair and silk combinations of heavier weave. While color contrasts are marked there are some soft effects, such as the blending of Persian colorings. Alternate rows of high color are seen, but this endures mainly on the border.

Silk sweaters are extensively offered in the square block weave, as well as the plain knitted mesh. The tuxedo coat model is offered in all the colorings that blaze forth from the color card as well as pastel tints.

KNIFE PLAITING IS FAVORED

Most of the Latest Summer Wraps Have Tiny Side Panels of This Decoration.

Knife-plaiting is still in favor. Some of the shops display gowns with skirts in a triple tier of plaited crepe de chine flounces. Most of the summer gowns of latest design have tiny side panels of knife plaiting and fit only across the shoulders. Foulard gowns, which this season extensively employ knife-plaited panels and sleeves of georgette, are chiefly of two types. One type has a V shaped neck opening on a white organdie vest; the other has a surplice bodice, crossing in soft folds.

The STRANGE CASE of CAVENDISH

By RANDALL PARRISH

Author of "THE DEVIL'S OWN" "MY LADY OF THE NORTH" ETC.

COPYRIGHT BY RANDALL PARRISH

Dash! Romance! Mystery!

Begins with a baffling crime in New York's most fashionable section and shifts immediately to one of the wildest of mining camps.

Introduces a new heroine into fiction—the newspaperwoman.

Concerns largely the adventures of Stella Donovan, reporter, and her successful unraveling of a strange mystery. Proves that a woman and a woman's wit may frequently penetrate where a man would be helpless. A blending of East and West, with the real spirit of both localities.

Belleville baseball team won from Hillcrest, Toronto team, at Peterboro on Friday, by a score of 5-4. Belleville will now play at Galt on Wednesday, and at Belleville on Saturday for the final championship games.

The degree team of Yarker Lodge, I.O.O.F., paid a fraternal visit to Napanee Lodge, No. 86, on Tuesday evening last and conferred the Second Degree. Refreshments were served at the close of the lodge meeting.

An educational Poultry Demonstration will be held in the Armouries, Napanee, on Wednesday, November 1st, and Thursday, November 2nd. For full particulars read "The Express." Everybody welcome. Admission free. 45-tf

A number of the ladies of Trinity church have collected and shipped two cases of clothing for the Northern Ontario fire sufferers. Many of the garments in the cases were made by the ladies from materials purchased with the cash donations given them.

A cabin cruiser motor boat, belonging to Percy Hart, was burned at Adolphustown on Wednesday last. The occupants, Mr. Hart, Arthur Goodwin, and one other had to swim ashore from the burning craft. Looking for a gas leak with a match caused the mishap.

A Toronto despatch states that an order-in-council was passed by the Ontario government on Friday formally appointing Timothy J. Rigney, K.C., to be crown-attorney for the city of Kingston and county of Frontenac, succeeding the late John L. Whiting, K.C. Mr. Rigney has also been appointed city solicitor for the City of Kingston.

Mrs. Martin Deline, one of the Northern Ontario fire victims, was a former resident of Roblin. Mr. and Mrs. Martin Deline and two sons, Henry and Stanley Deline, with their families were all burned out, loosing everything they had, and barely escaping with their lives. Mrs. Martin Deline herself was so badly burned that she died in the New Liskeard hospital on Saturday.

The taxi driver eyed his prospective client suspiciously. "Are you taking the cab by the hour or by the day?" he asked.

"By the year," replied the worried-looking fare. "I am looking for a house."

Jack: "Pa, what are ancestors?"

Father: "Well, I'm one of yours. Your grandpa is another."

Jack: "Oh! Then why is it that folks brag about them?"

Miss Brown (to Jones, who has claimed the first dance): "You're quite an early bird, Mr. Jones!"

Jones (making an attempt to be gallant): "Ah! By Jove yes! And I've caught the worm, too!"

CHOOSE YOUR WINTERS' REQUIREMENTS FROM ROBINSON'S MERCHANDISE

For thirty-five years we have studied the likes and dislikes of the people in Napanee and vicinity. We know your demands for quality, for style, for workmanship, for value. We lay our fall stocks wide open for your inspection. We are perfectly satisfied to rest our case with your good judgment. Our various ranges of merchandise in our various departments are the largest you will find locally.

THE NEW DRESS GOODS FOR FALL AND WINTER WILL HAVE A PLEASING FASCINATION TO EVERY WOMAN

As usual The Robinson Co. is showing the very newest weaves and colors, and the special prices attached will go a long way to make your fall and winter purchases unusually profitable.

Why you should make this store your shopping place for Dress Fabrics:

1st—You choose from hundreds and hundreds of the best fabrics obtainable.

2nd—The price you pay is the lowest consistent with good quality.

3rd—You will be served courteously and intelligently. Such a service as we offer is of distinct advantage to customers. You profit.

Now as to Weaves for fall. We cannot put into print here all of the various weaves to be had, but it is your privilege **to investigate,** and our desire to inform you as to the most desirable fabrics.

Commencing Wednesday, October 18th, we will have on display **the Newest Fall Fabrics,** and we shall add many items especially priced for the event—materials you need for now and future wear. It will pay you to get in touch with our splendidly equipped Dress Goods Department.

Homespuns, Serges, Tricotines, Tweeds, Broadcloths, Poiret Twills are in great demand. Black, Navy, Brown are leading colors, while all the other shades are in constant demand.

Obtainable in three colors.

Obtainable in all sizes from 16 to 40.

PURCHASERS OF HORROCKSES FLANNELETTES PRACTICE WISE ECONOMY

Users of Horrockses Flannelettes have proven to their own satisfaction the absolute truth of the above statement.

In using Horrockses Flannelette you save two or three times making, you have a more comfortable garment, the colors and patterns are better, the short close naps do not wear or wash off easily.

These desirable qualities can be had at an average of 20c. a garment more than the ordinary Flannelettes.

Horrockses Colored Stripe Flannelettes in beautiful shades of Pink, Blue, and Tan, 33 to 34 inches wide, at 45c. yard.

Horrockses white in plain weave, velvet napped Flannelettes come 33 inch, at 40c.; 36 inch, at 45c.

Horrockses white twill weave, extra heavy Flanelette, comes 33 inch wide, at 50c. yd.; 36 inch, at 60c. yd.

Canadian Flannelettes, white and colored, come at 20c., 25c., 30c., 35c., 40c., and 45c. yard.

Horrockses Flannelette

Flannelette is the "Cinderella" of the textile family—unromantic. But when Prince Jack Frost begins to whirl the dead leaves, he puts the more frivolous materials in second place, and then you are the fairy godmother who transforms Flannelette into warm night-dresses and pyjamas, petticoats and cuddly kimonas.

CHILDREN'S HEATHER HOSE, $1.00 PAIR

Girls' and Boys' all wool, ribb Heather Hose, in brown shades, with plain knit seamless feet, spliced heels and toes. Sizes 7 to 8½.

BOYS' SOCKS, $1.00 PAIR

Boys' all wool Socks, good quality, with fancy turn down cuff, colors grey and brown. Sizes 8 to 10.

WOMEN'S CASHMERE HOSE, $1.00 PAIR

All wool Cashmere Hose, elastic ribb top, extra special heels, toes and soles. Colors black, brown. Sizes 8½ to 10½.

WOMEN'S CLOCKED SILK HOSE, $2.00 PAIR

Pure thread Silk Hose, with silk embroidered clocks in contrasting shades. These have mercerized lisle top, extra spliced lisle heels and toes. Colors are navy, brown, black, white.

Quality, Service, Value.
